satelettronica

Technical information should always be available to the foremen and mechanics, because their careful and constant adherence to the instructions is essential to ensure vehicle road-worthiness and safety. In addition, the normal basic safety precautions for working on motor vehicles must, as a matter of course, be observed.

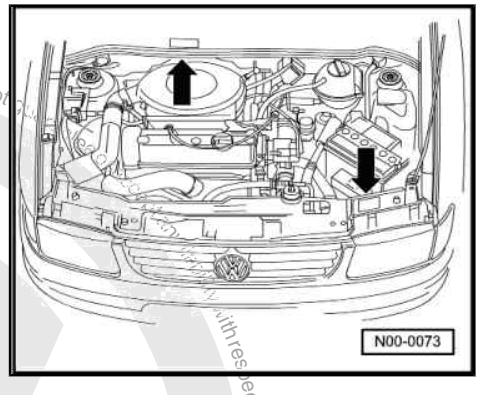
00 – Technical data

1 Vehicle identification data

(VKI000307; Edition 07.2014)

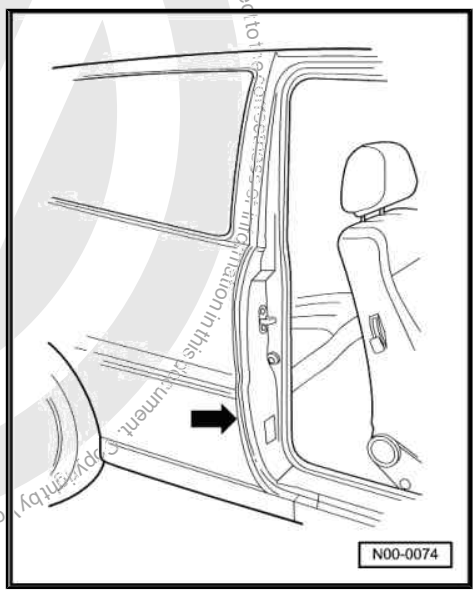
1.1 Type plate and vehicle identification number

The identification plate is located on the left of the front lock carrier.



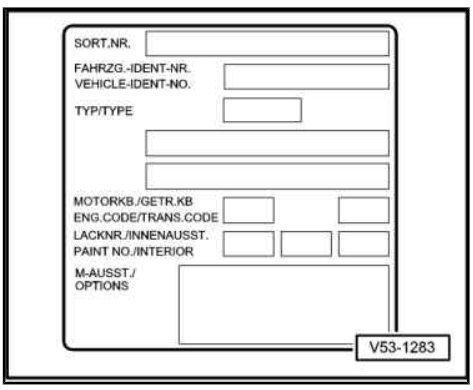
The vehicle identification number (chassis number) is stamped on the rear bulkhead of engine compartment. It can be seen through a window in the plenum chamber cover.

On some vehicles the identification plate is attached to the passenger door lock pillar.



1.2 Vehicle data sticker

The vehicle data plate is glued on the rear left cross panel in the luggage compartment.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or make any representation in this document with respect to its accuracy or completeness. Copyright by Volkswagen AG.

50 – Body - front

RO: 50 40 55 50

1 Renewing engine bracket

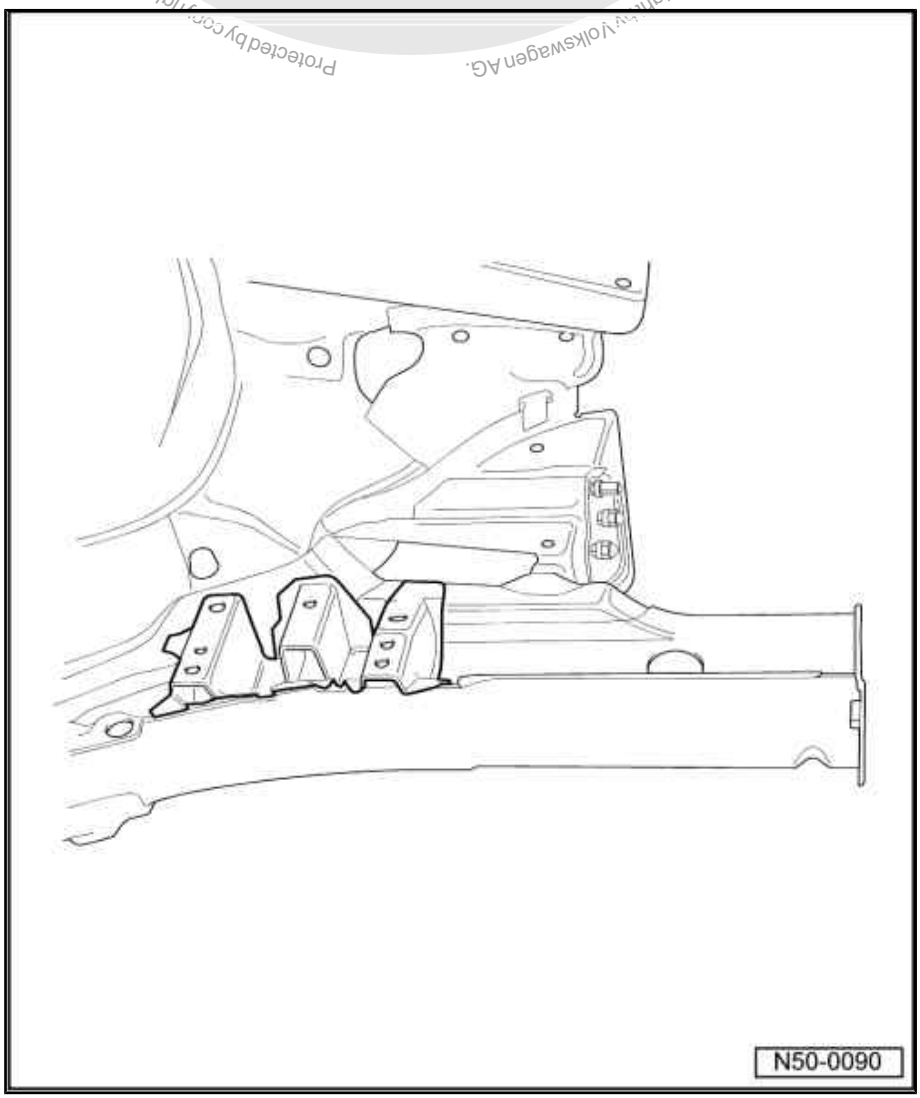
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

1.1 Left engine console

1.1.1 Cutting locations



– Separate original joint.
– Remove remaining material.

satelettronica

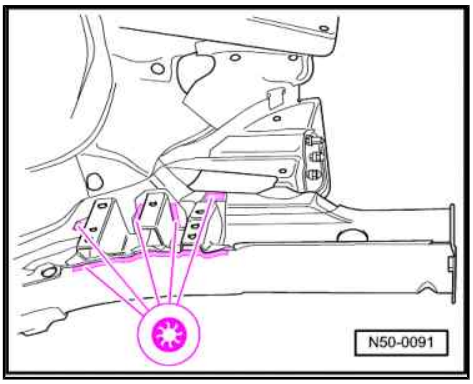
1.1.2 Replacement part

- Mounting bracket

1.1.3 Welding in

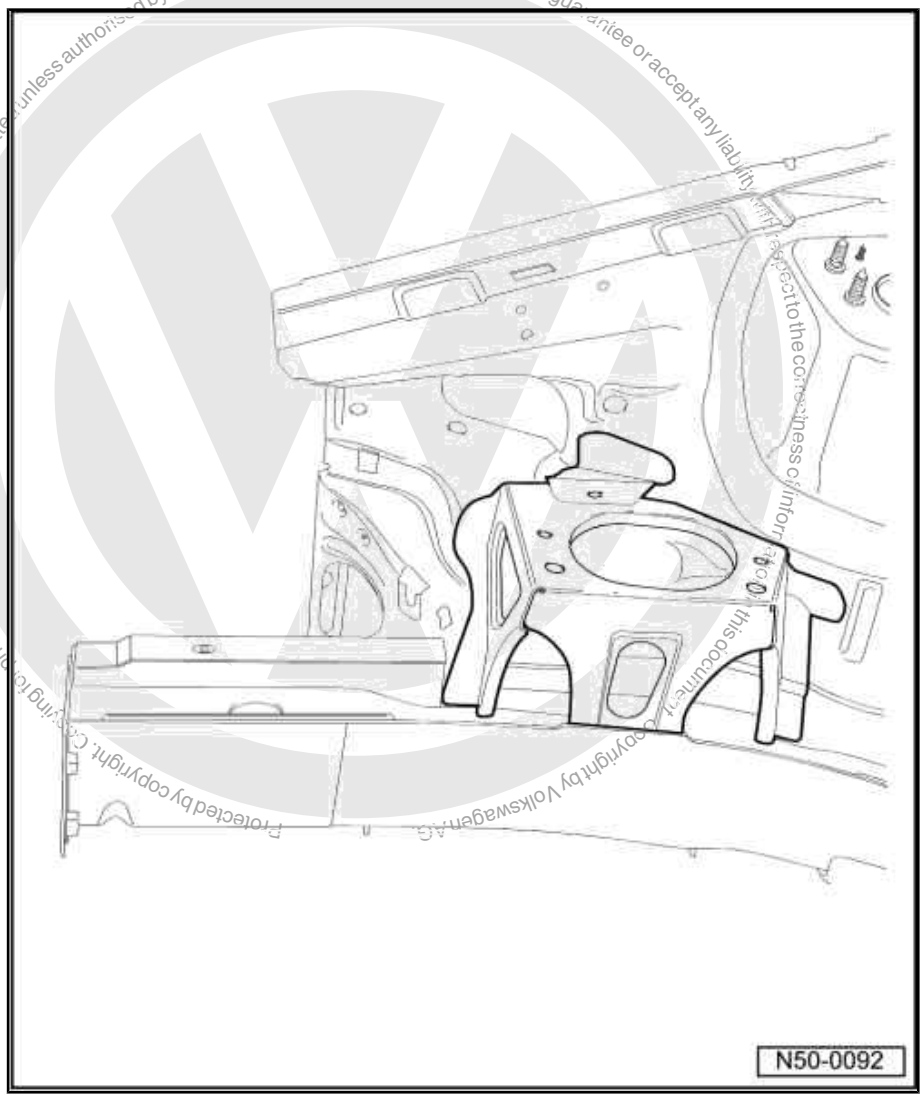
Preparing new part

- Drill holes for SG plug weld seam (7 mm ∅).
- Secure vehicle and new part to alignment bracket.
- Weld in new part, SG plug weld seam.



1.2 Right engine bracket

1.2.1 Cutting locations



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica

– Separate original joint.
– Remove remaining material.

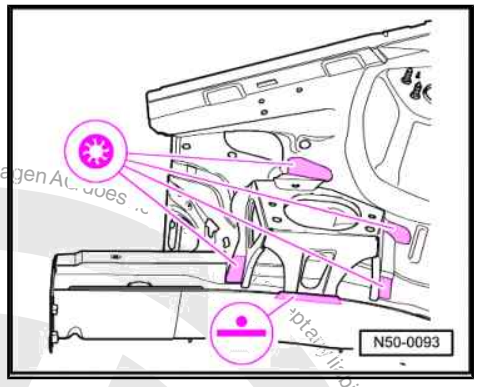
1.2.2 Replacement part

♦ Mounting bracket

1.2.3 Welding in

Preparing new part

– Drill holes for SG plug weld seam (7 mm ∅).
– Secure vehicle and new part to alignment bracket.
– Weld in new part, SG plug weld seam.
– Spot weld remaining joint in, RP spot weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not give any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

RO: 50 41 55 50

2 Renewing support

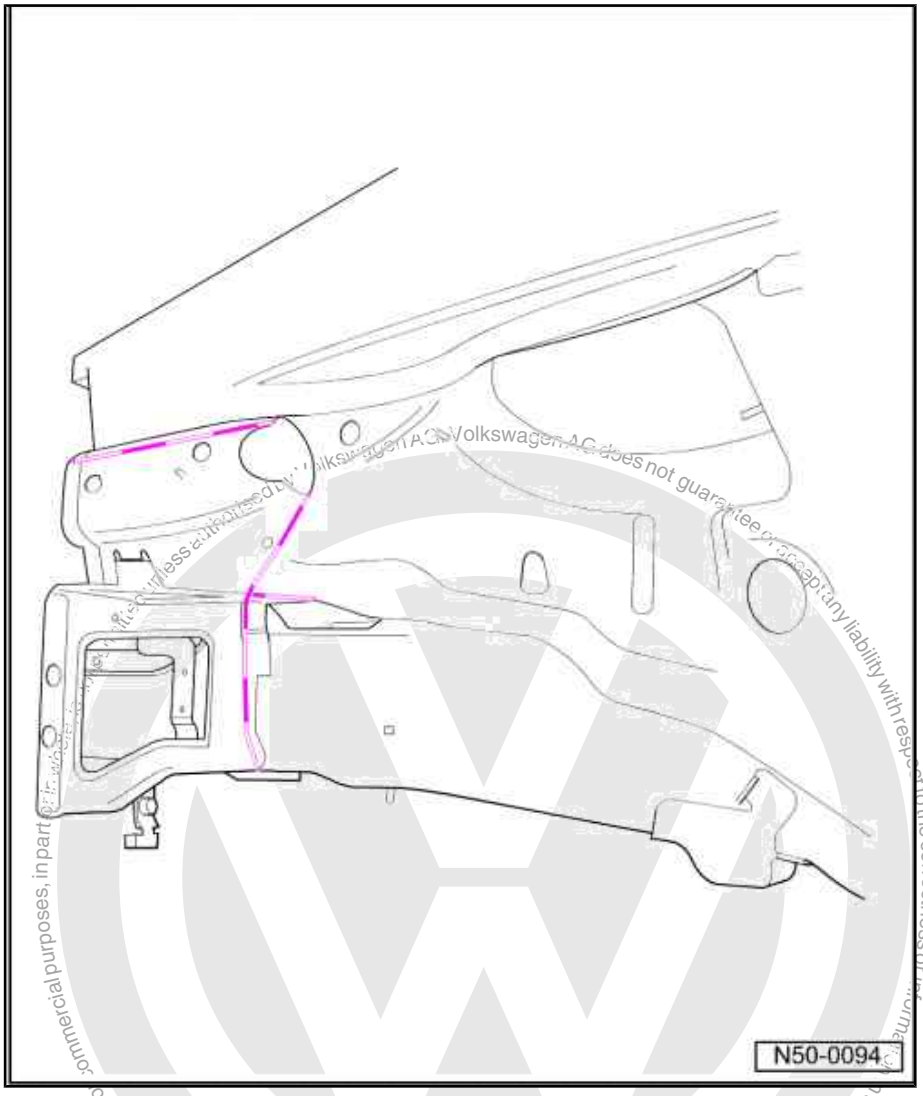
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

2.1 Removing

2.1.1 Cutting locations



– Cut off support for bumper.
– Remove remaining material.

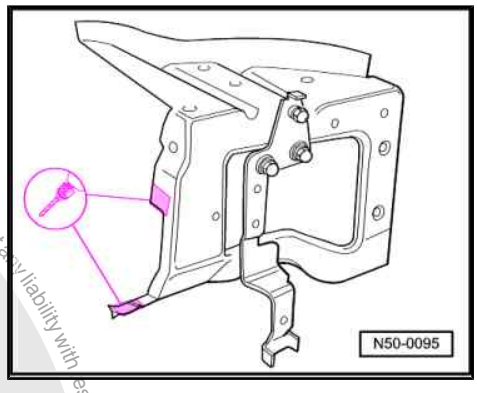
Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of this document. Copyright by Volkswagen AG.
satelettronica

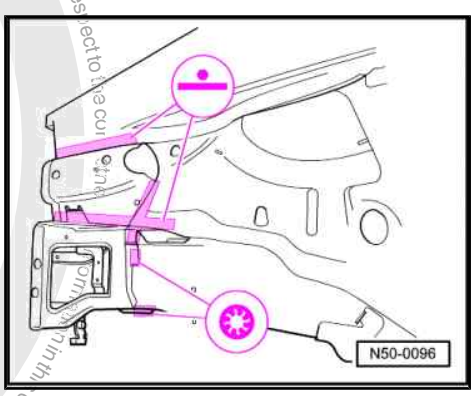
2.1.2 Replacement parts

- Support (part designation: bracket)
- Cover plate for wheel housing

2.1.3 Welding in

Preparing new part





– Drill holes for SG plug weld seam (7 mm ∅).
– Adapt new part and fix in position.
– Weld in new part, RP spot weld seam.
– Weld in remaining joint, SG plug weld seam.

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica

RO: 50 74 55 52

3 Renewing front wheel housing

WARNING

Observe safety notes!

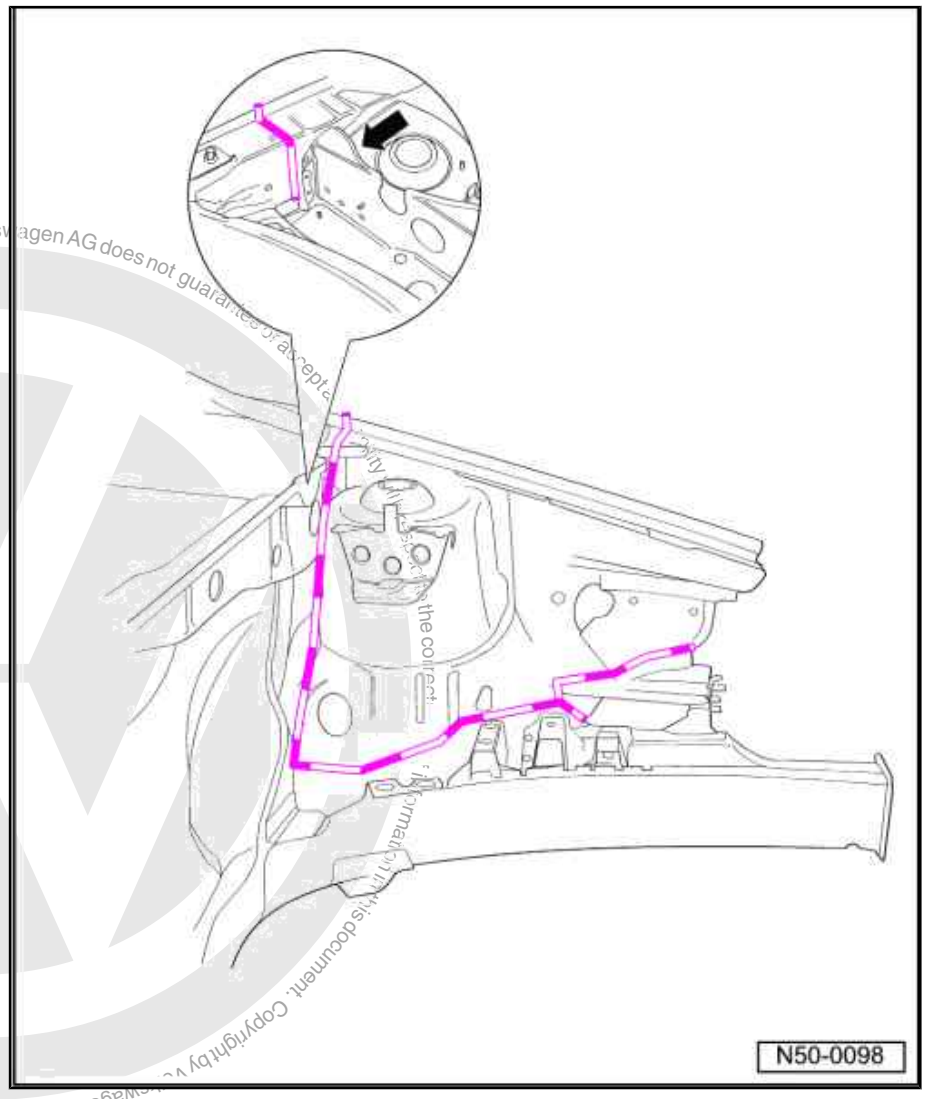
⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

3.1 Removing

Note

The upper wheel housing longitudinal member must always be renewed complete.

3.1.1 Cutting locations



Protected by copyright. Copyright for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

- Separate web plate -arrow- from suspension strut mounting and wheel housing.
- Bend web plate -arrow- towards windscreen.
- Position cutting line approx. 15 - 20 mm in front of bulkhead.
- Cut out wheel housing behind suspension strut mounting.
- Remove remaining material.

3.1.2 Replacement parts

Note

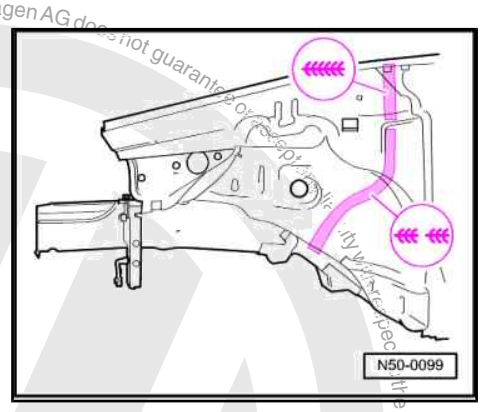
The wheel housing is supplied with no pre-drilled holes for the suspension strut mounting. The holes must be drilled with the aid of the alignment bracket set. The alignment bracket is used as a drill template.

- ♦ Front wheel housing
- ♦ Upper wheel housing longitudinal member

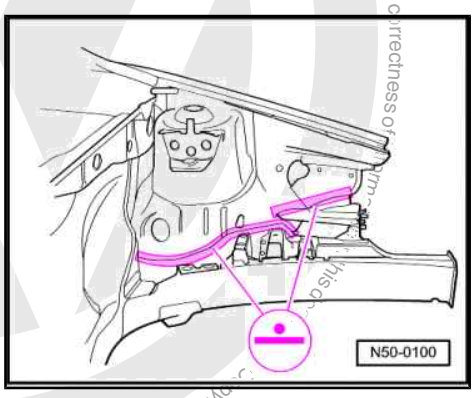
3.1.3 Welding in

Preparing new part

- Transfer parting cut to new part and cut out.
- Be sure to add approx. 10 mm for overlap in lower joint surface.
- Fix new part on alignment bracket.
- Before welding in, fit wing. When doing this, check width, length and diagonal dimensions.
- In parting zone, carry out offset overlap weld to both sides under square aperture, SG staggered continuous weld seam.

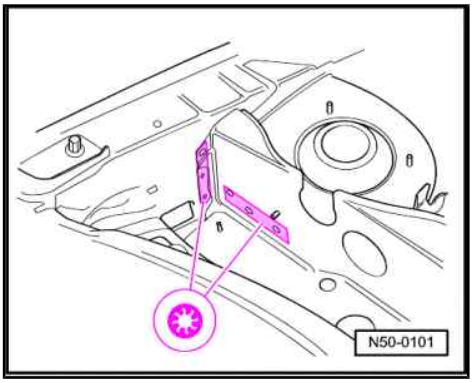


- In parting area, carry out butt weld above square aperture, SG continuous weld seam.
- Spot weld wheel housing to lower longitudinal member, RP spot weld seam.

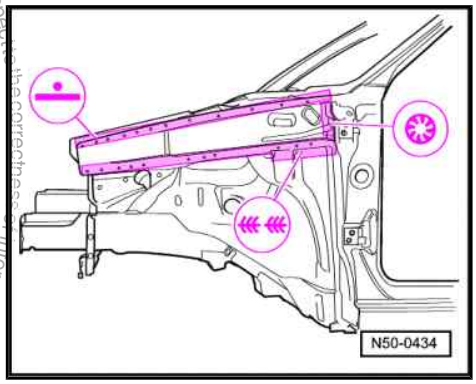


Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability whatsoever in respect of the correctness of this copy.
Copyright by Volkswagen AG.
satelettronica

– Spot weld wheel housing to support for bumper, RP spot weld seam.



– Bend web plate back and weld in again, SG plug weld seam.
– Spot weld upper wheel housing longitudinal member, RP spot weld seam.
– Additionally weld in wheel housing in area of upper wheel housing longitudinal member, SG staggered continuous weld seam.
– Weld in remaining joint, SG plug weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica

RO: 50 75 55 50

4 Renewing front wheel housing - part section

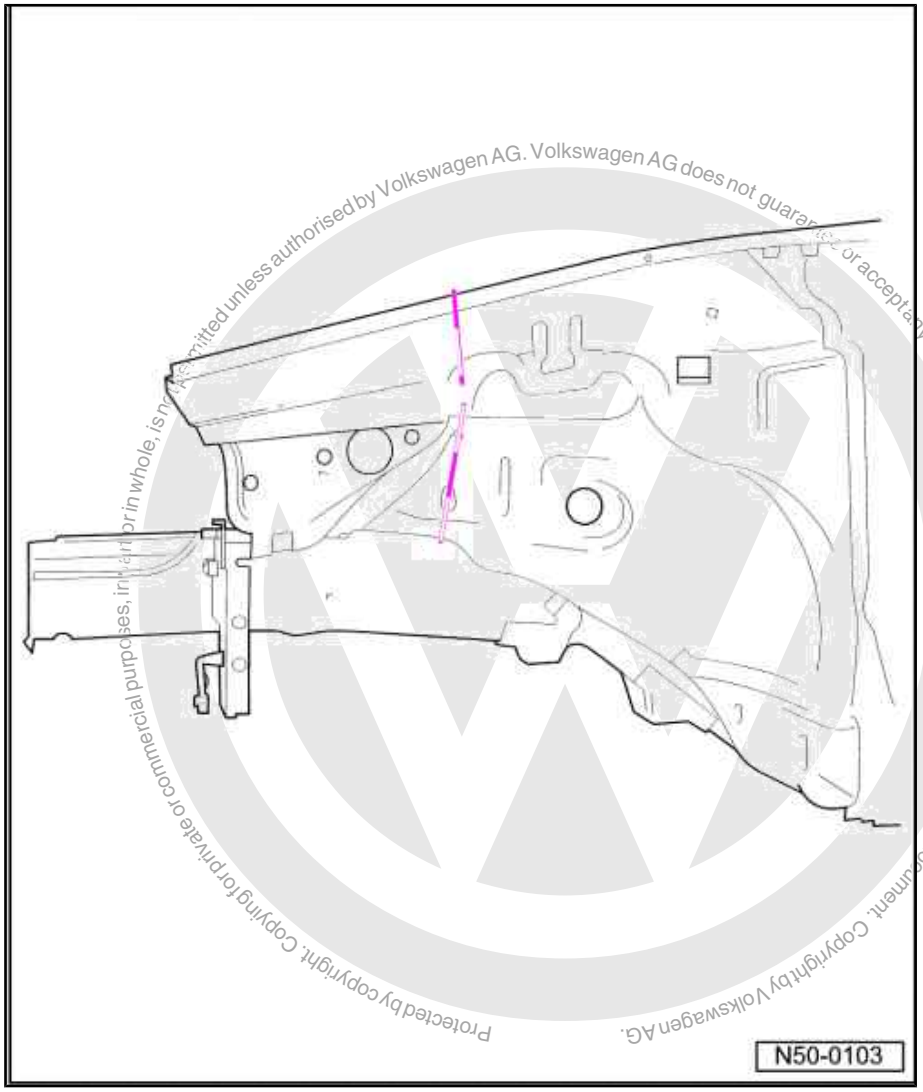
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

4.1 Removing

4.1.1 Cutting locations



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

– Cut wheel housing out in front of suspension strut mounting.
– Remove remaining material.

– Cut out upper wheel housing longitudinal member as required (50 mm offset to wheel housing parting cut).

4.1.2 Replacement parts

- Front wheel housing
- Upper wheel housing longitudinal member
- Cover plate for wheel housing

4.1.3 Welding in

Preparing new part

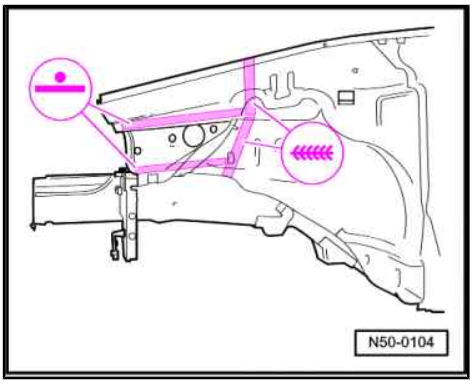
– Transfer parting cuts to new parts and cut out.

– Fix new part on alignment bracket.

– Before welding in, fit wing. When doing this, check width, length and diagonal dimensions.

– Butt weld parting zone, SG continuous weld seam.

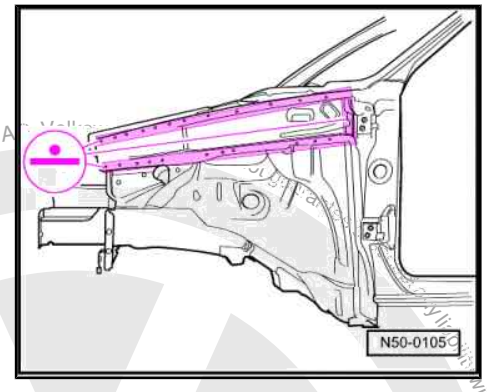
– Weld in wheel housing at longitudinal member, RP spot weld seam.



– Weld in cover plate, RP spot weld seam.

– Spot weld upper wheel housing longitudinal member, RP spot weld seam.

– Butt weld parting cut at upper wheel housing longitudinal member, SG continuous weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Copyright by Volkswagen AG. No liability with respect to the correctness of information in this document.
satelettronica

RO: 50 79 55 50

5 Renewing longitudinal member before subframe mounting - part section

WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

5.1 Removing

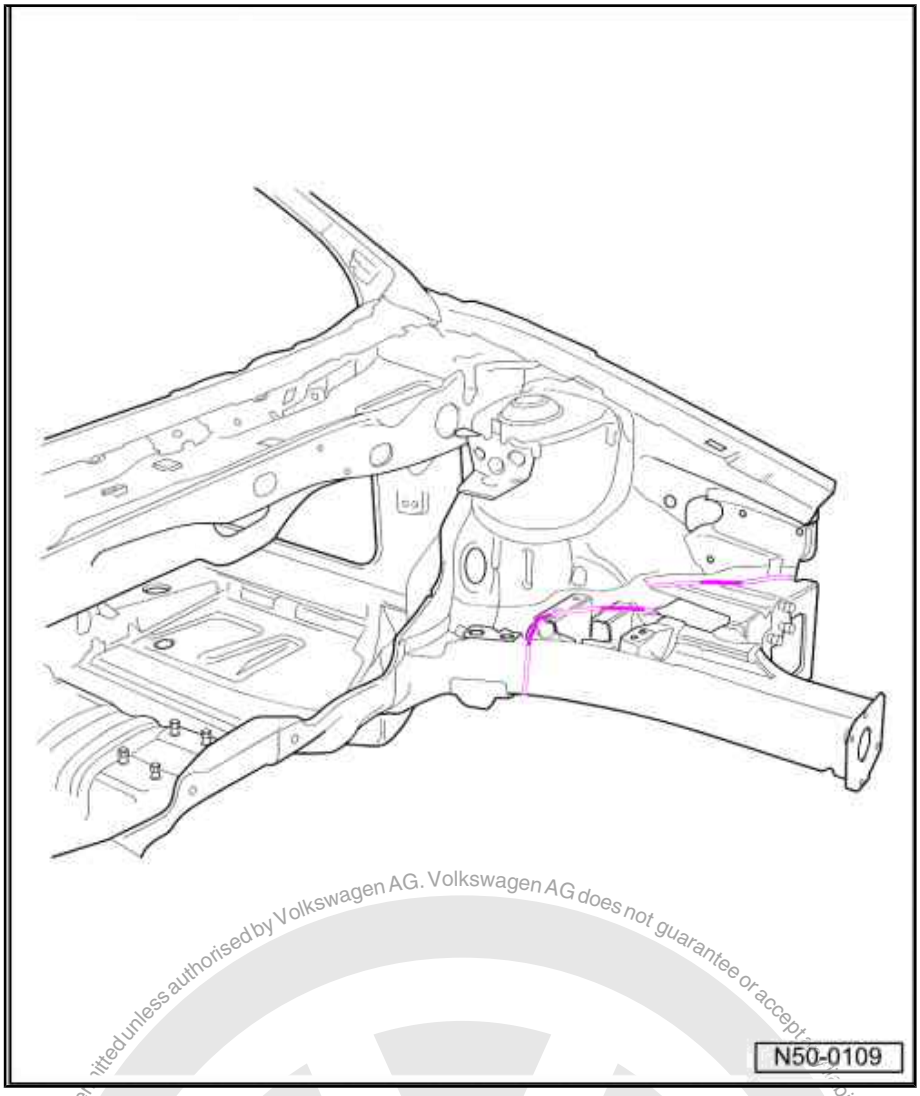
Note

- *If the extent of damage permits, the parting cut can also be moved towards the front.*
- *The parting cuts on the longitudinal member and cover plate must be offset by 5 cm.*

5.1.1 Cutting locations

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica



- Position cutting point in front of subframe mounting.
- Separate longitudinal member cover plate at hole above subframe mounting.
- Cut out longitudinal member.
- Remove remaining material.

5.1.2 Replacement part

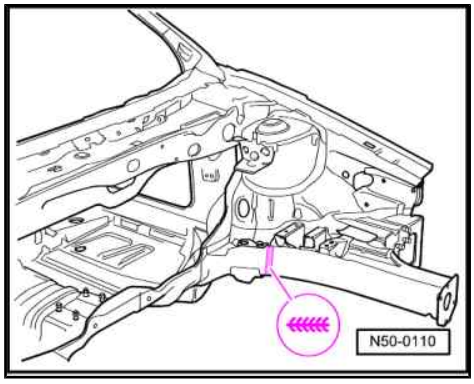
♦ Longitudinal member with reinforcements and captive nuts

Protected by copyright. Copyright by Volkswagen AG.
Copyright for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document.
satelettronica

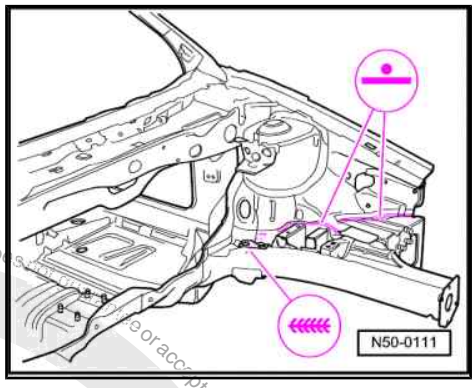
5.1.3 Welding in

Preparing new part

– Transfer parting cut to new part and cut out.



– Secure longitudinal member to alignment bracket and butt weld, SG continuous weld seam.
– Butt weld cutting point of cover plate, SG continuous weld seam.
– Weld in longitudinal member at wheel housing, RP spot weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

RO: 50 79 55 50

6 Renewing longitudinal member behind subframe mounting - part section

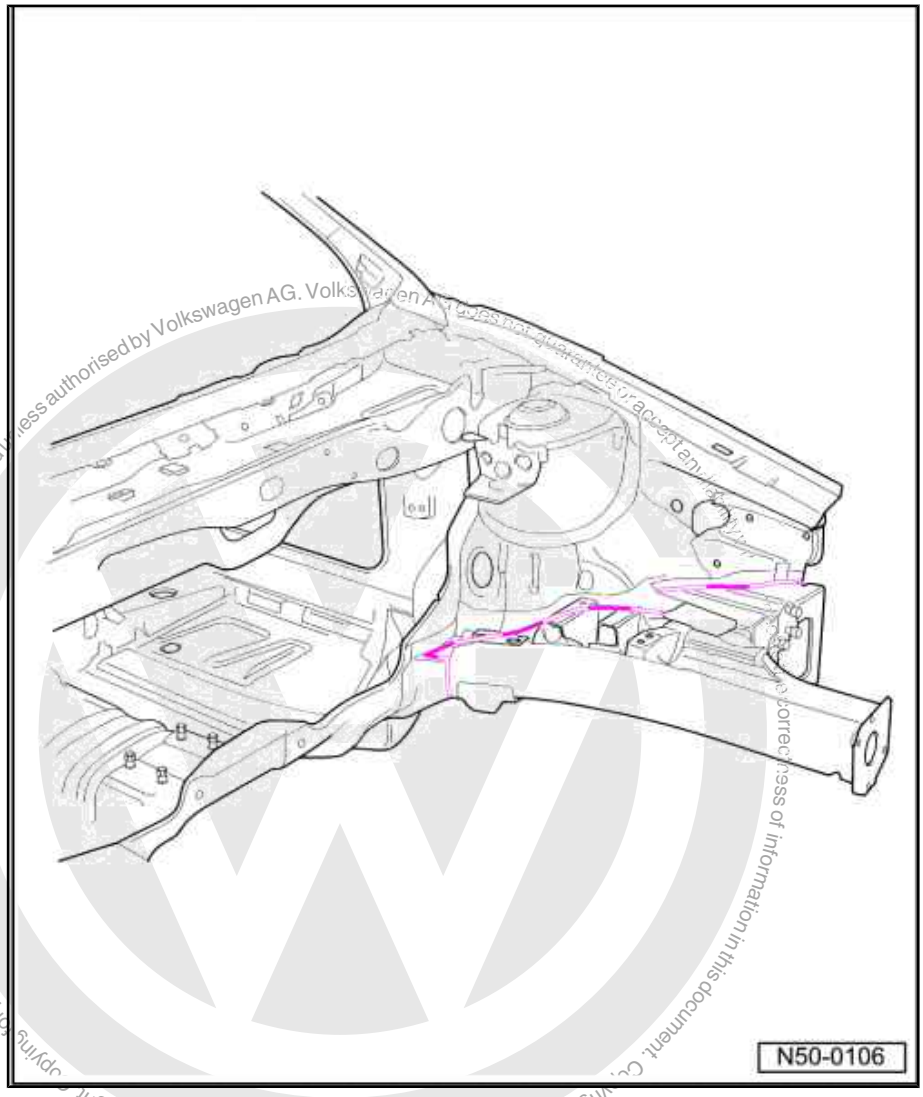
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

6.1 Removing

6.1.1 Cutting locations



– Position cutting point behind subframe mounting.
– Separate original joint of longitudinal member cover plate.

satelettronica

– Cut out longitudinal member.
– Remove remaining material.

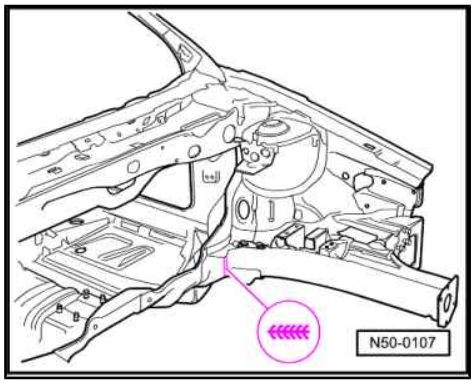
6.1.2 Replacement part

♦ Longitudinal member

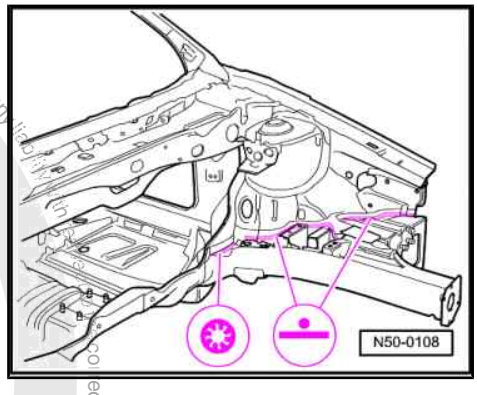
6.1.3 Welding in

Preparing new part

– Transfer parting cut to new part and cut out.



– Secure longitudinal member to alignment bracket and butt weld, SG continuous weld seam.
– Weld in longitudinal member at wheel housing, RP spot weld seam.
– Weld longitudinal member cover plate to bulkhead, SG plug weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

RO: 50 80 55 00

7 Renewing front section of longitudinal member

WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

Note

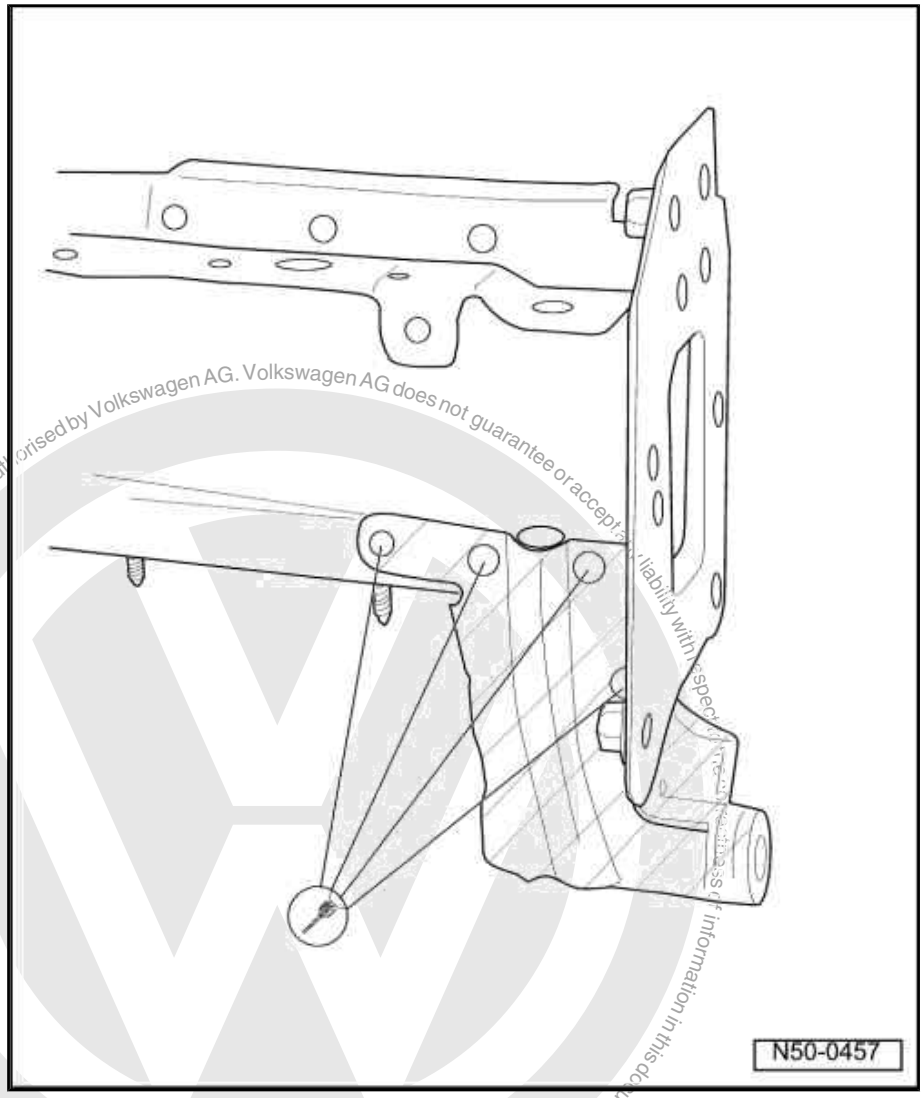
The towing eye must be removed before the front section of the right-hand longitudinal member can be renewed.

7.1 Removing

7.1.1 Cutting locations

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

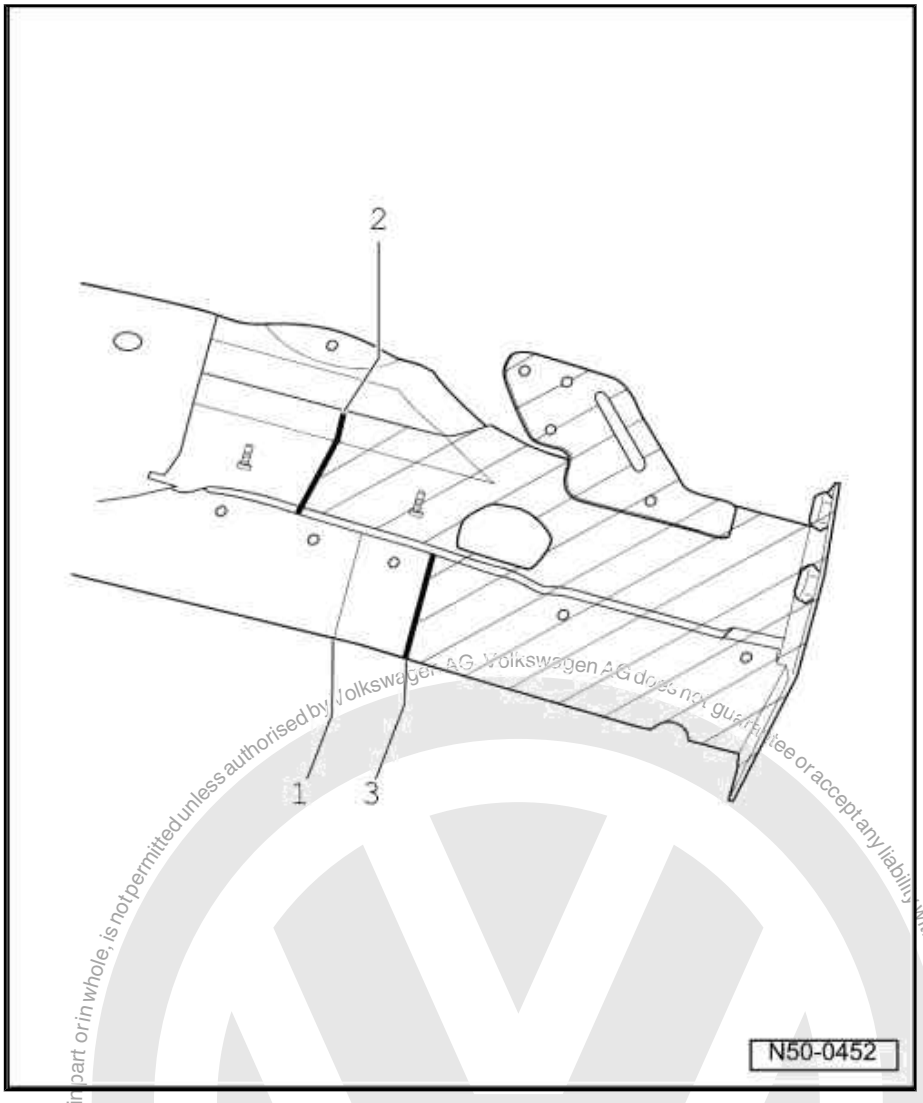
satelettronica



– Separate original joint.

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

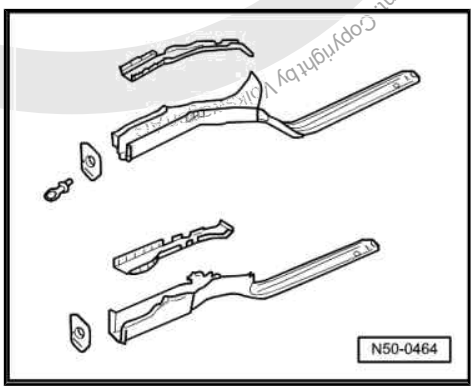
satelettronica



- For part section repair, carry out parting cut as follows:
- 1 = Weld seam (plate seam weld).
- 2 = Position parting cut for longitudinal member cover plate 30 mm behind weld seam (plate weld seam).
- 3 = Position parting cut for longitudinal member 30 mm in front of weld seam (plate weld seam).
- Remove remaining material.

7.1.2 Replacement parts

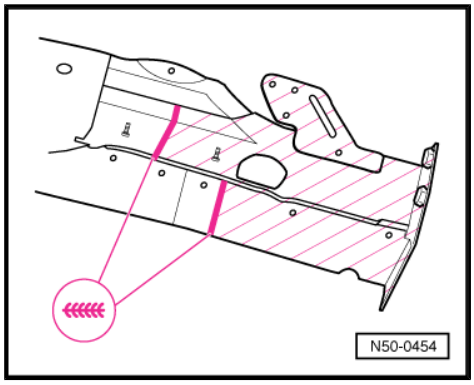
- Front section of longitudinal member
- Cover plate
- Sealing plate (part designation: cover plate)
- Towing eye (only right-hand side)



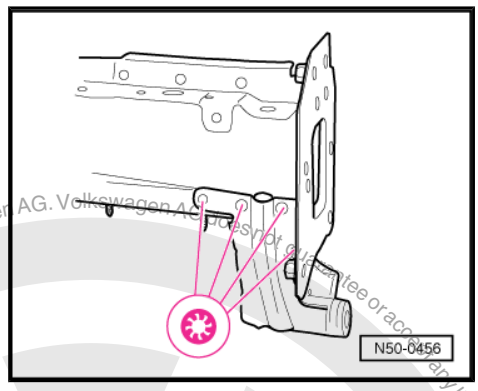
Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document.
satelettronica

7.1.3 Welding in

– Adapt new part to fit and secure on alignment bracket.



– Weld in front section of longitudinal member, SG continuous weld seam.
– Weld in towing eye, SG continuous weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

51 – Body - centre

RO: 51 03 55 00

1 Renewing roof

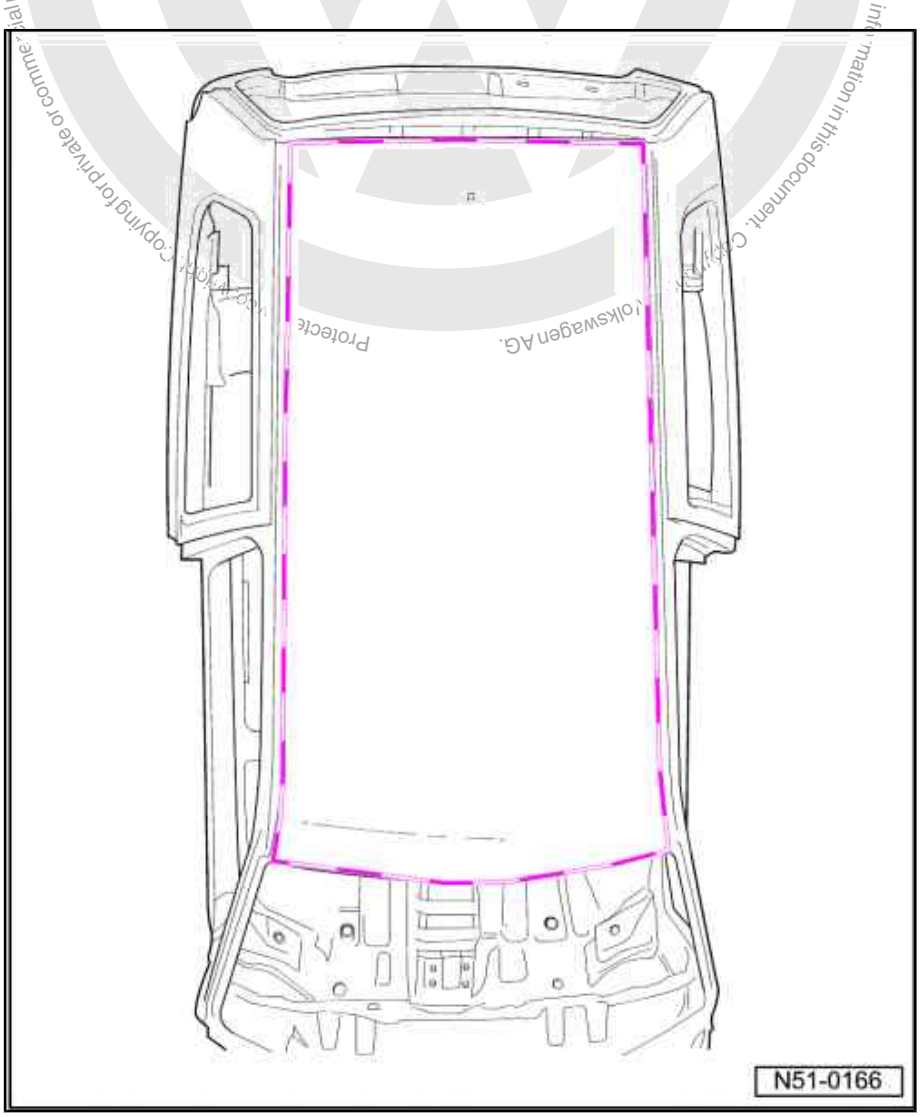
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

1.1 Removing

1.1.1 Cutting locations



– Cut out roof.

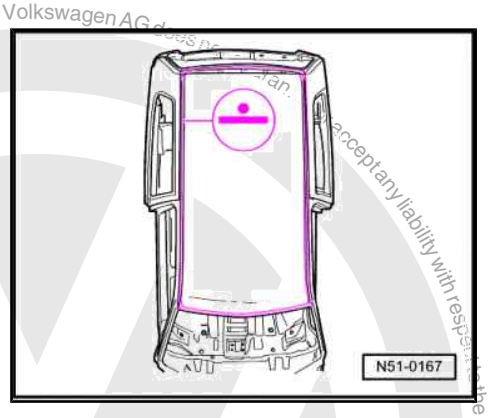
– Remove remaining material.

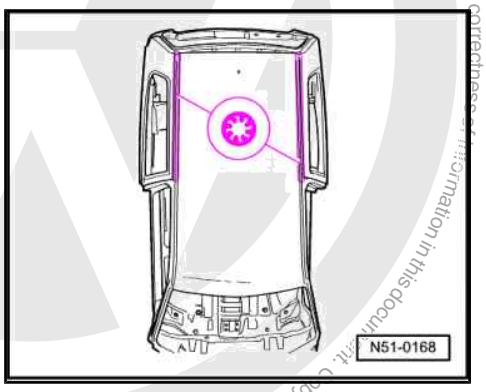
Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

1.1.2 Replacement part

- Roof

1.1.3 Welding in





– Weld in roof, RP spot weld seam.
– If rear area is inaccessible due to installed side windows, SG plug weld seam.

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica

RO: 51 07 55 50

2 Renewing front roof cross member

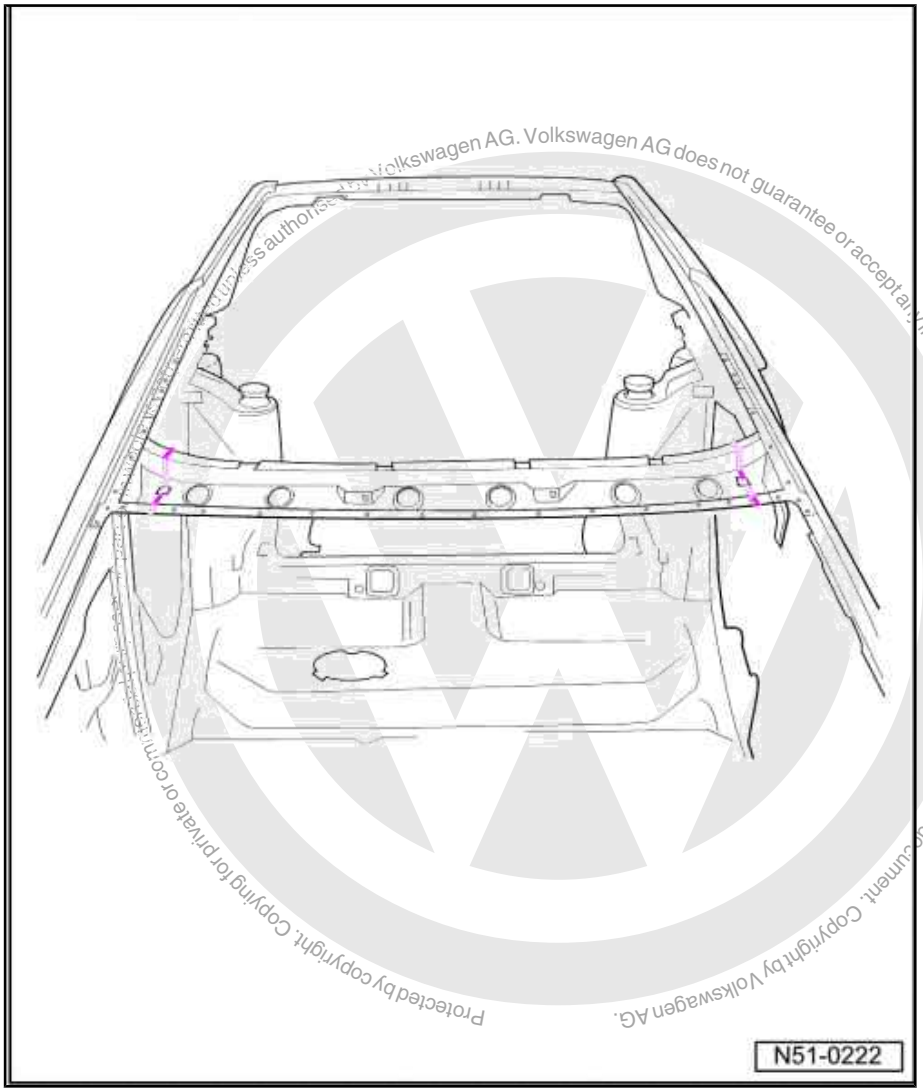
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

2.1 Removing

2.1.1 Cutting locations



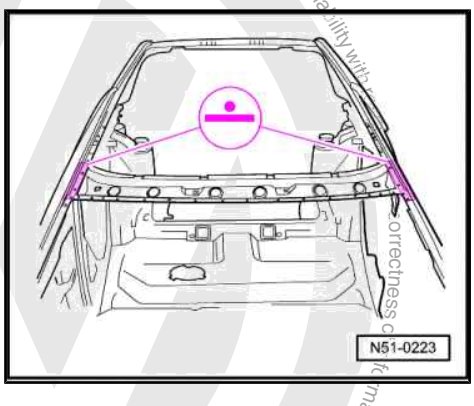
– Cut out cross member.
– Remove remaining material.

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

2.1.2 Replacement part

- Roof cross member

2.1.3 Welding in



– Adapt new part to fit and fix in position.
– Weld in new part, RP spot weld seam.
– Weld in roof ⇒ page 50

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

RO: 51 09 55 50

3 Renewing rear cross member

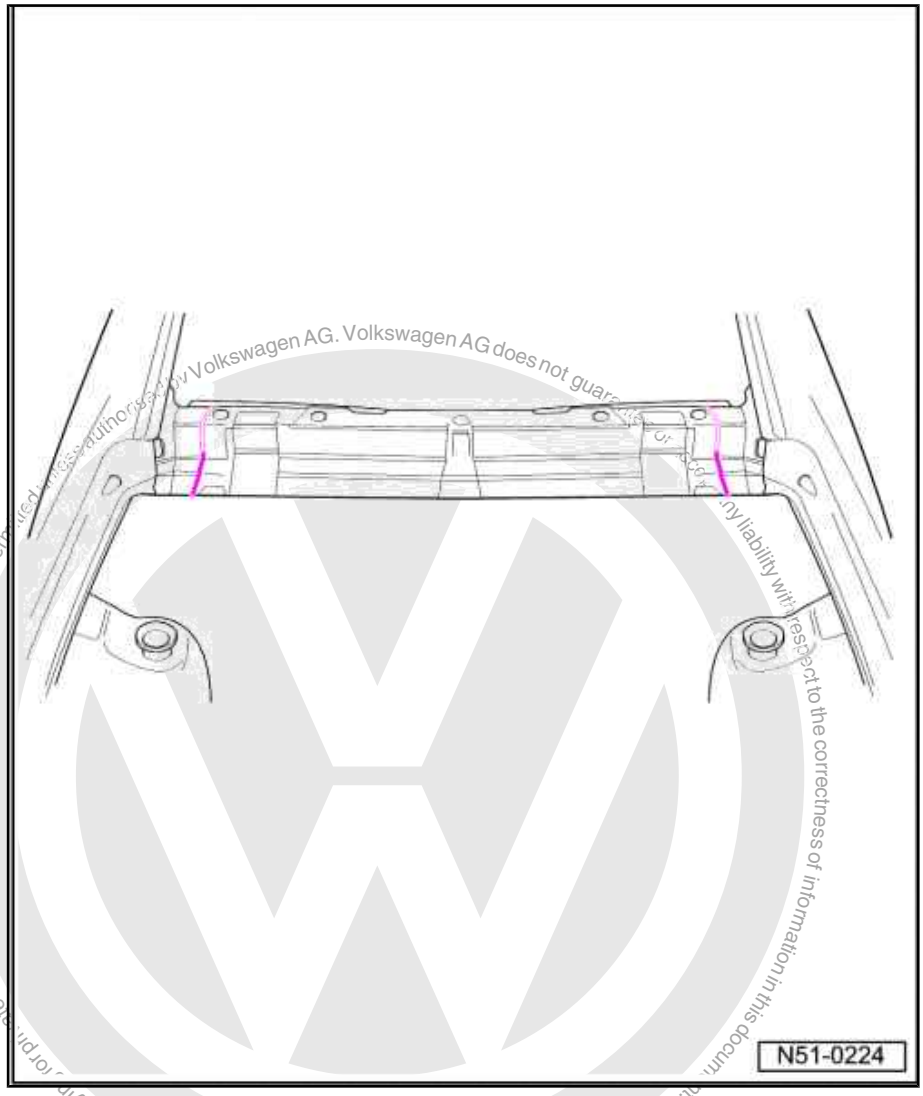
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

3.1 Removing

3.1.1 Cutting locations



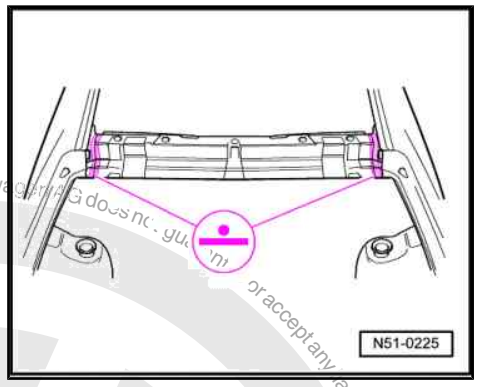
– Cut out cross member.
– Remove remaining material.

satelettronica

3.1.2 Replacement part

- Roof cross member

3.1.3 Welding in



– Adapt new part to fit and fix in position.
– Weld in new part, RP spot weld seam.
– Weld in roof ⇒ page 50 .

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. satelettronica

RO: 51 27 55 00

4 Renewing outer side panel - part section (2-door)

WARNING

Observe safety notes!

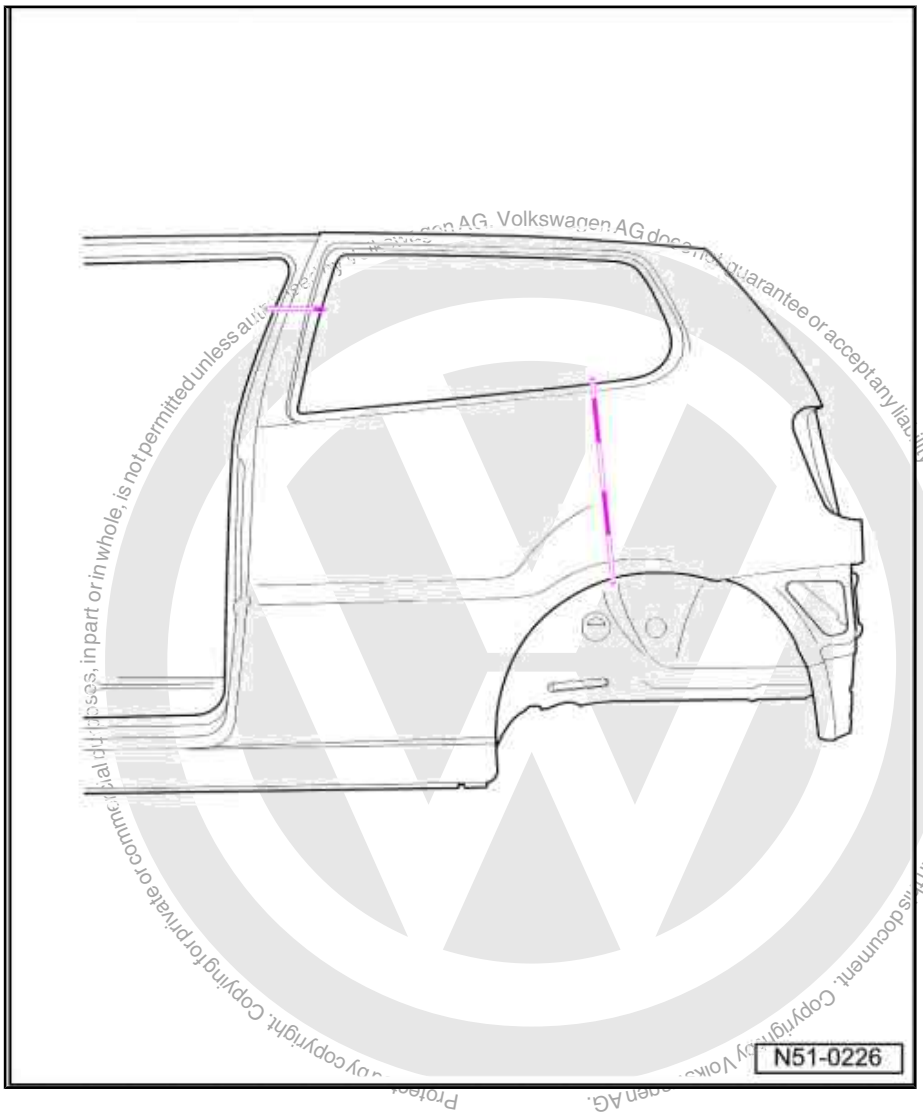
⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

4.1 Removing

Note

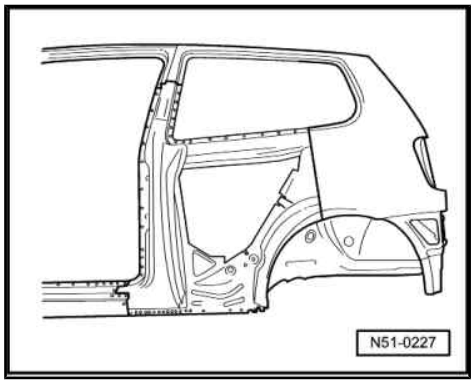
Make parting cut above wheel housing with pneumatic sabre saw -V.A.G 1523- .

4.1.1 Cutting locations



satelettronica

– Locate parting cut on each B-pillar according to extent of damage.
– Cut out side panel.
– When cutting out side panel, take care not to damage internal reinforcement in B-pillar.
– Separate original joint.
– Remove remaining material.



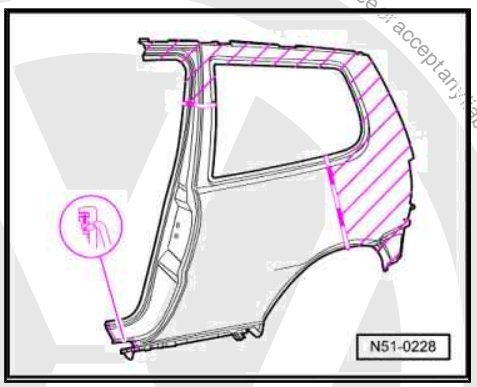
4.1.2 Replacement part

♦ Side panel

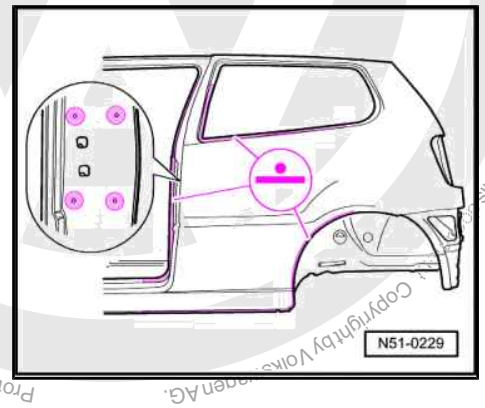
4.1.3 Welding in

Preparing new part

– Transfer parting cut to new part and remove shaded area.



– Make holes in outer joint surface of new part.
– Adapt side member to fit with vehicle free of tension
– Before welding in, check gaps to adjacent parts.
– Place backing material behind parting cuts.
– Weld in side panel, RP spot weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this

5 Renewing outer side panel - part section (4-door)

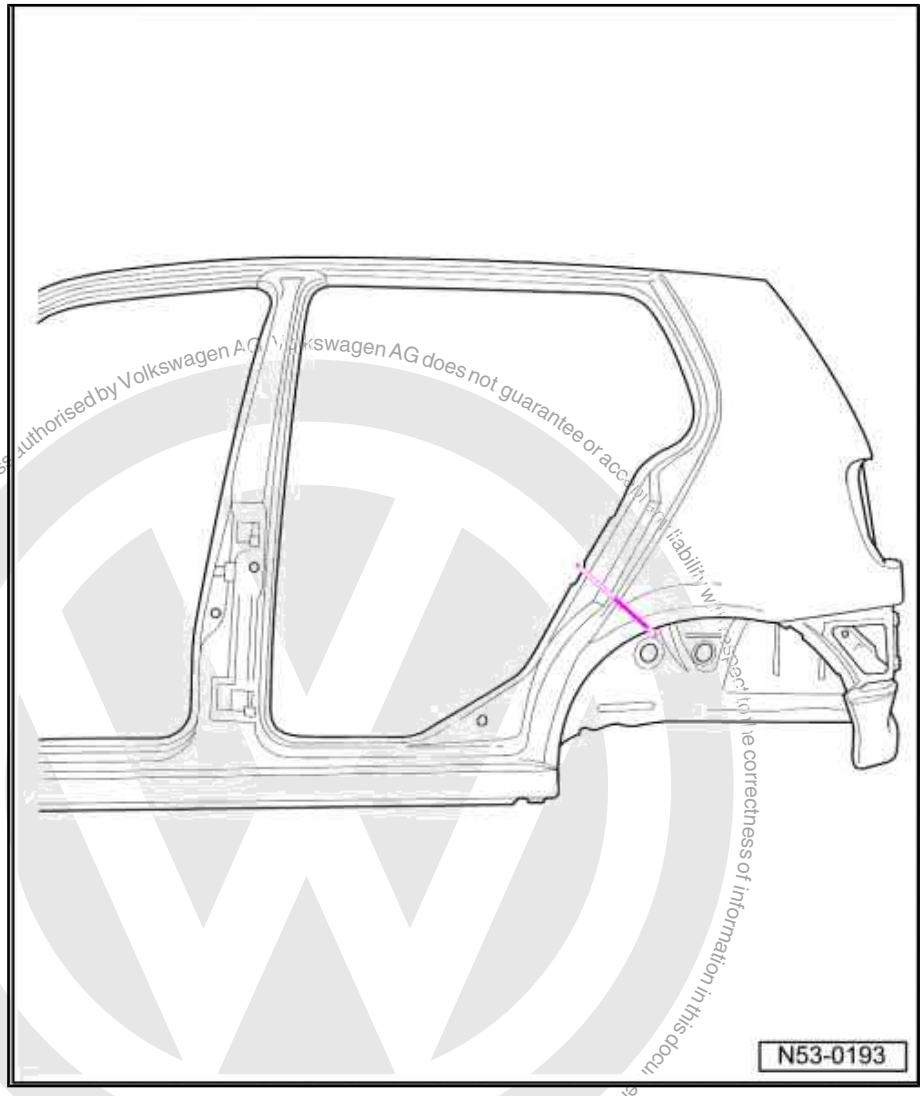
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

5.1 Removing

5.1.1 Cutting locations



Protected by copyright. Copyright by Volkswagen AG.
Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG.
satelettronica

– Locate parting cut below C-pillar reinforcing for striker pin according to degree of damage.
– Separate original joint.

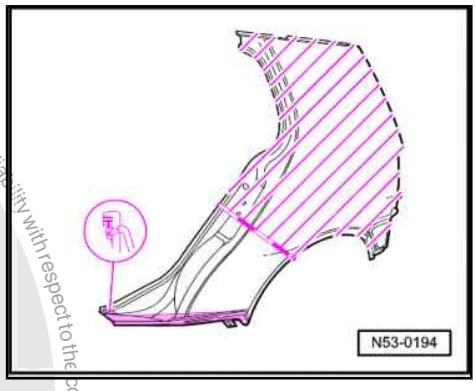
5.1.2 Replacement part

- Side panel

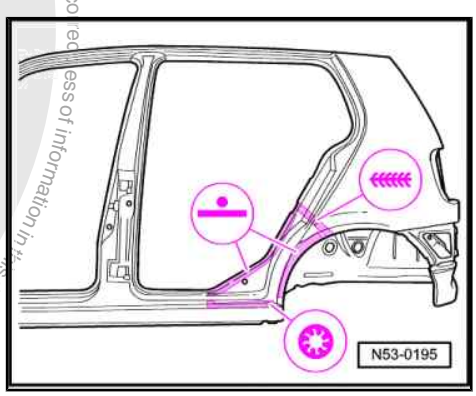
5.1.3 Welding in

Preparing new part

- Transfer parting cut to new part and remove shaded area.
- Make holes in outer joint surface of new part.
- Adapt side member to fit with vehicle free of tension



- Check shut lines to door.
- Place backing material behind parting cut.
- Butt weld parting cut, SG continuous weld seam.
- Weld in side panel, RP spot weld seam.
- Weld in remaining joint, SG plug weld seam.
- Reform wheel housing flange ⇒ page 114 .



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

6 Renewing A-pillar - part section

WARNING

Welding, parting using spark generating machines/tools or tinning in foam treated areas creates gases which are hazardous to health and environment. Therefore, refrain from using these processes.

Use 2-component - component filler material to smooth out irregularities.

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

6.1 Removing

Note

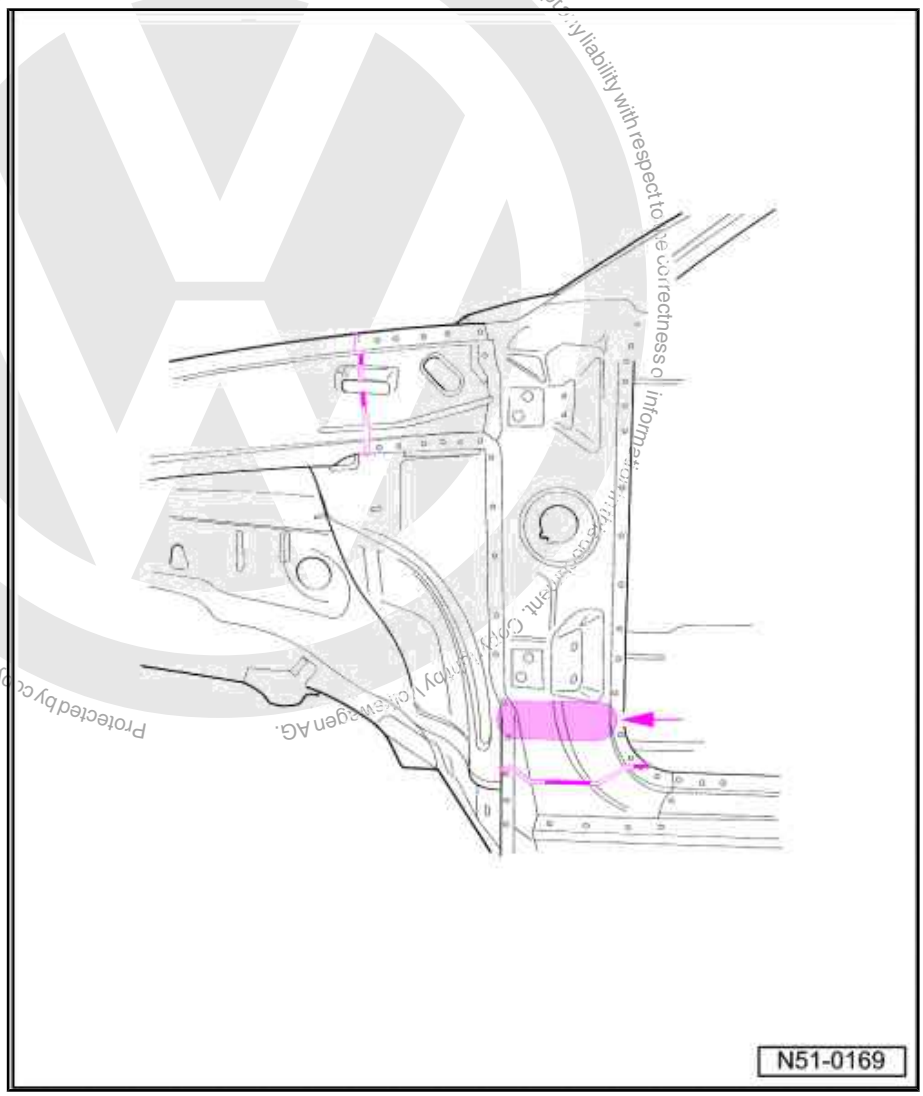
- *The A-pillar is foam treated below the door retaining strap for acoustic reasons.*
- *Only use pneumatic sabre saw -V.A.G 1523- or compressed air driven hammer -V.A.G 1577- for parting cut!*

6.1.1 Cutting locations

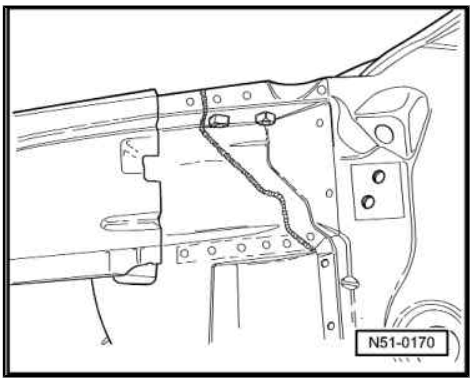
Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information.
Copyright by Volkswagen AG.

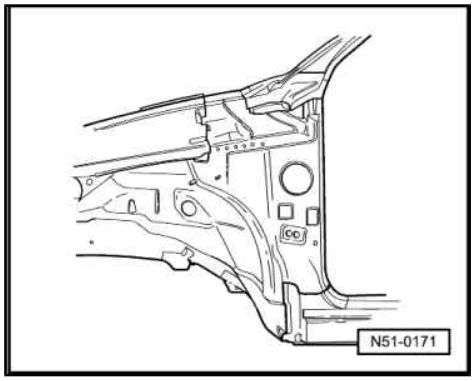


- Locate parting cut on upper wheel housing longitudinal member according to degree of damage.
- Foam treated area -arrows-.
- Scrape out as much remaining foam as possible before starting grinding work.
- Make lower parting cut above side member.



satelettronica

– Cut out upper wheel housing longitudinal member.
– Cut out A-pillar.
– Remove remaining material.



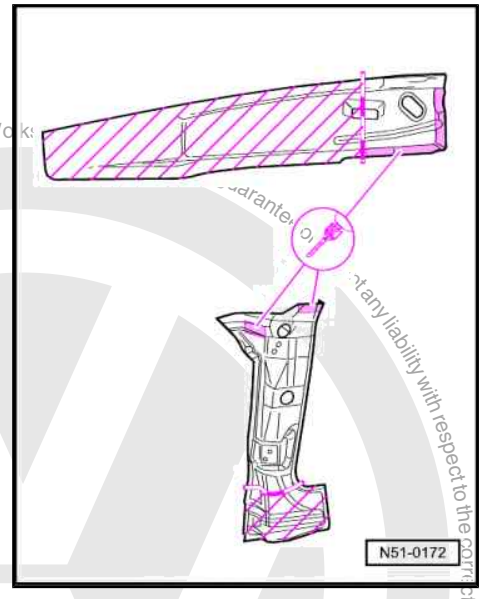
6.1.2 Replacement parts

- Upper wheel housing longitudinal member
- Outer A-pillar.
- 2-component foam filler, Part No. D 000 111 A2

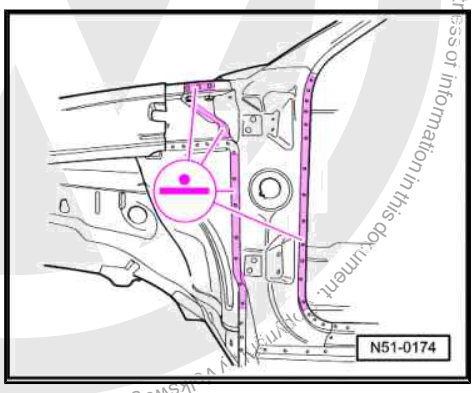
6.1.3 Welding in

Preparing new parts

– Transfer parting cuts to new parts and cut away shaded area.

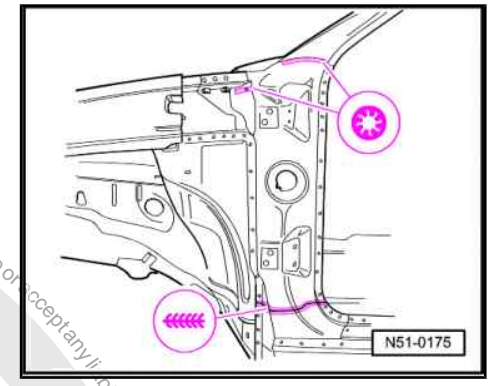


– Drill holes for SG plug weld seam (7 mm ∅).
– Adapt A-pillar to fit with vehicle stress free.
– Check exactness of fit with wing and door fitted.

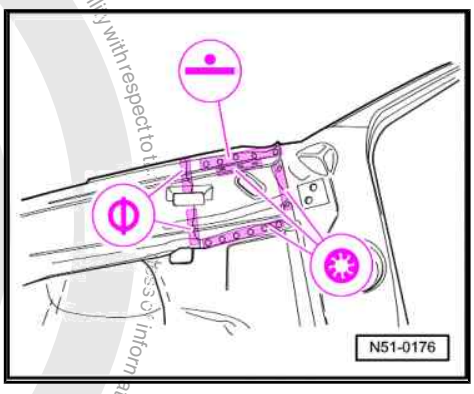


Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness or information in this document.
satelettronica

– Weld in A-pillar, RP spot weld seam.
– Weld in A-pillar, SG plug weld seam.



– Butt weld parting cut, SG continuous weld seam.
– Spot weld upper wheel housing longitudinal member, RP spot weld seam.
– Weld in parting cut, SG stepped weld seam.
– Weld in remaining joint, SG plug weld seam.



6.1.4 Foam insulation

Note

Before using foam read instructions for use.

– Install door retaining strap.
– After painting, treat cavity and allow approx. 10 minutes airing time.
– Mask off four-cornered holes.
– Foam treat area through hole -arrow-.
– Remove foam residue immediately with adhesive remover D 002 000 10.
– If the foam protrudes above the lower edge of the hole -arrow-, wait approx. 5 minutes after filling and cut out foam with a sharp knife.
– Then carry out cavity protection again to seal pores.

7 Renewing B-pillar - part section (2-door)

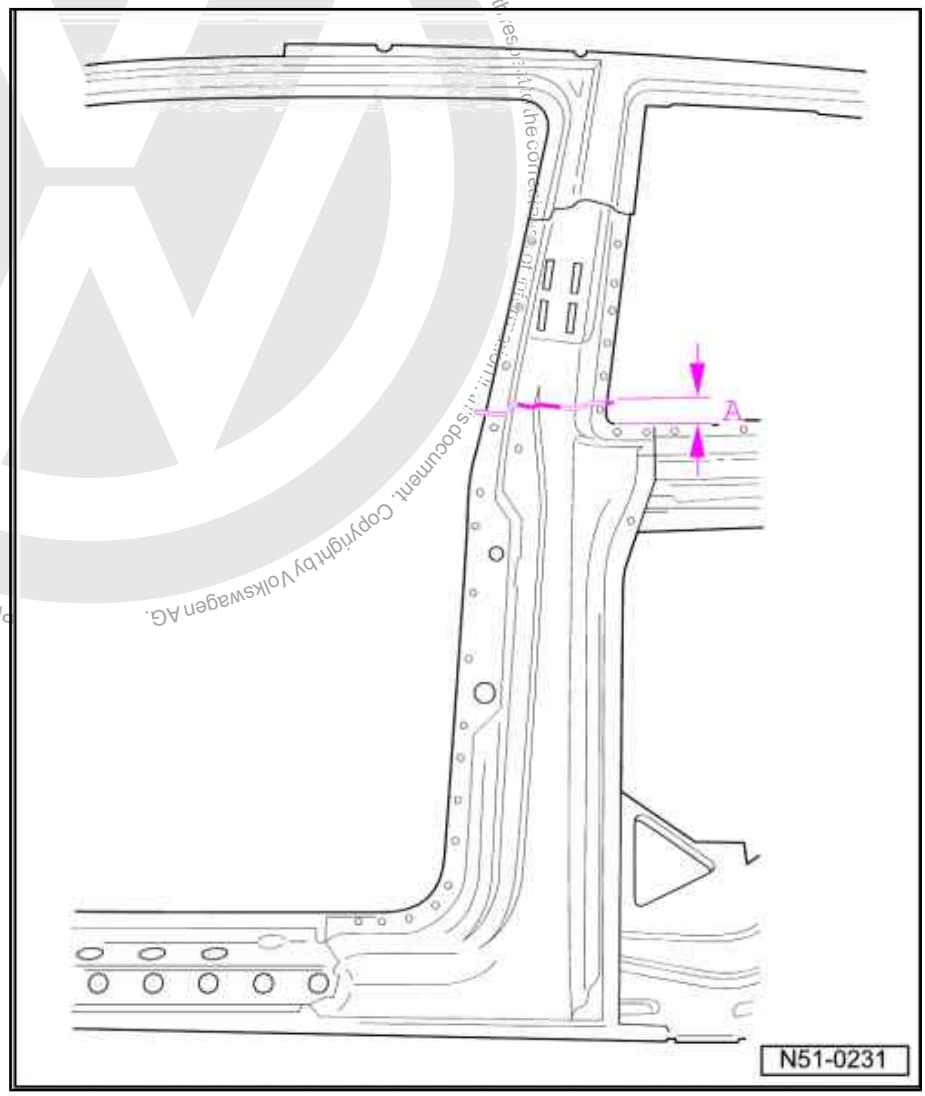
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

7.1 Removing

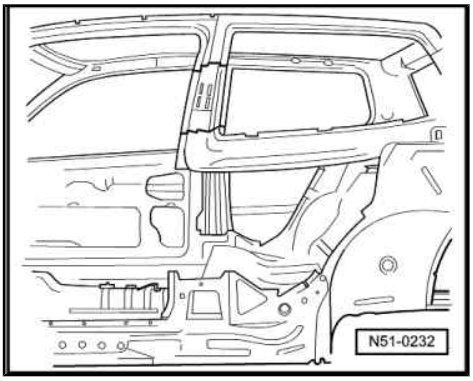
7.1.1 Cutting locations



– Position parting cut for B-pillar below reinforcing plate.
– Dimension A = 20 mm.

satelettronica

– Drill out original joint of B-pillar.
– Remove remaining material.



7.1.2 Replacement part

♦ B-pillar

7.1.3 Welding in

Preparing new part

– Transfer parting cut to new part and cut out.
– Adapt B-pillar to fit with vehicle free of tension.
– Check precision of fit with door and side panel fitted.
– Butt weld parting cut, SG continuous weld seam.
– Spot weld B-pillar, RP spot weld seam.

8 Renewing B-pillar - part section 11.99 ► (2-door)

WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

8.1 Removing

Note

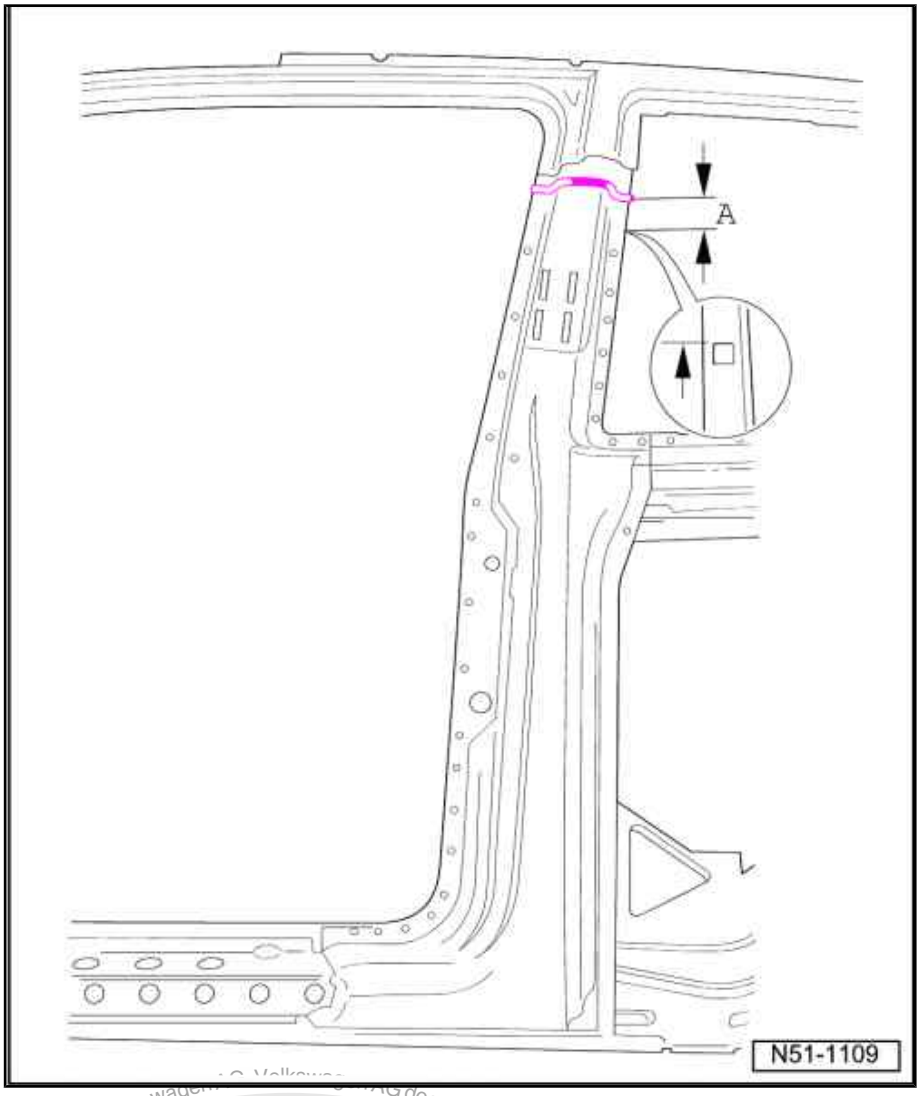
B-pillar is reinforced on vehicles from 11.99. This is the reason why the parting cut must be made above this reinforcing.

- Rear side member reinforcing already cut out.

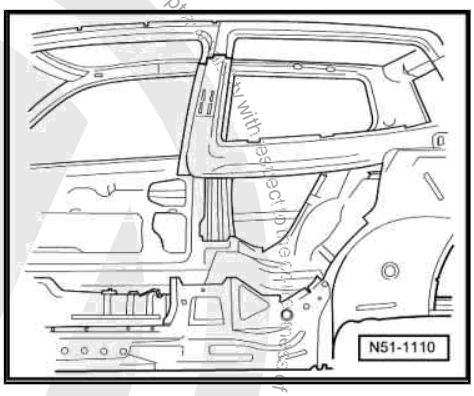
8.1.1 Cutting locations

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica



- Position parting cut for B-pillar above reinforcing plate.
- Dimension A = 30 mm.
- Drill out original joint of B-pillar.
- Remove remaining material.



8.1.2 Replacement part

♦ B-pillar with reinforcing.

satelettronica

8.1.3 Welding in

Preparing new part

- Transfer parting cut to new part and cut out.
- Adapt B-pillar to fit with vehicle free of tension.
- Check precision of fit with door and side panel fitted.
- Butt weld parting cut, SG continuous weld seam.
- Spot weld B-pillar, RP spot weld seam.

9 Renewing B-pillar (4-door)

WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

9.1 Removing

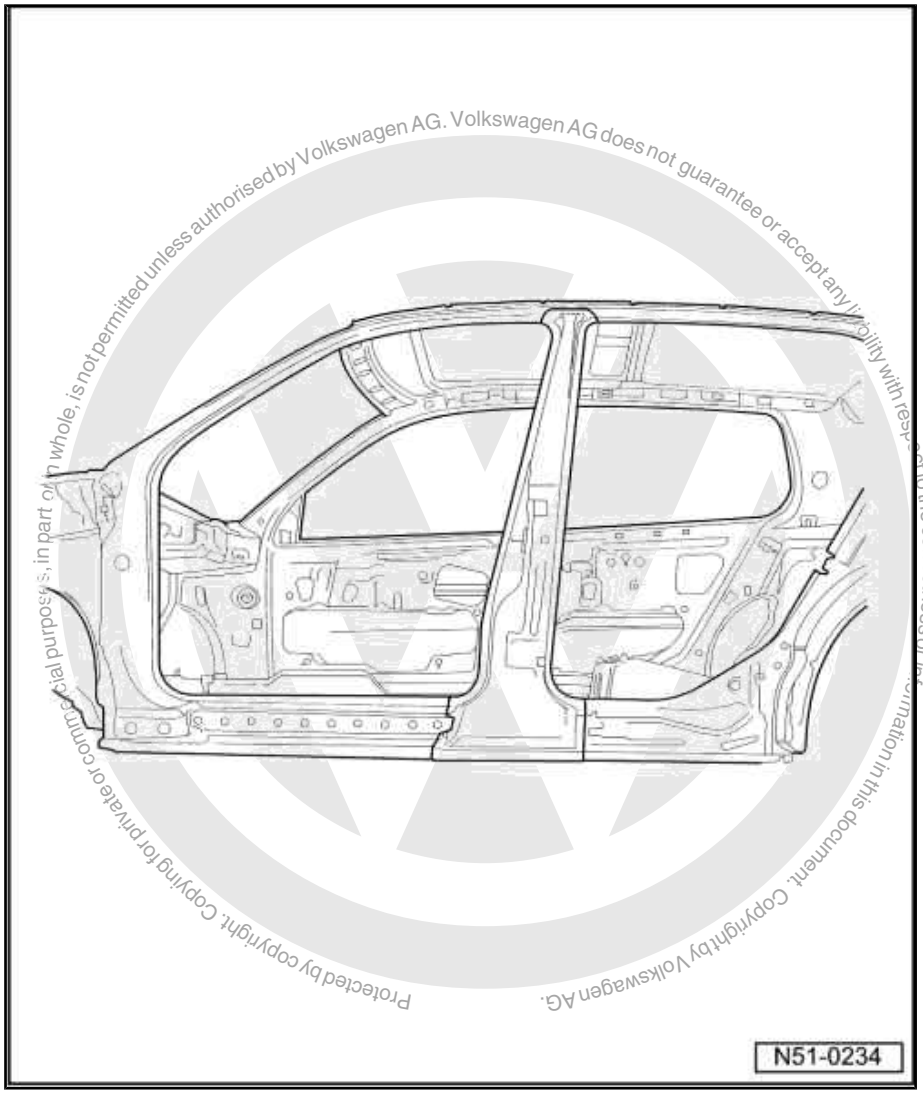
Note

Only a complete replacement is permitted due to internal reinforcing!

- Rear side member reinforcement already cut out, applies to vehicles ▸ 11.99.

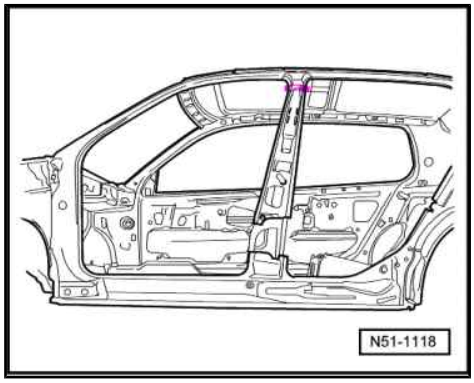
9.1.1 Cutting locations

satelettronica



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

– Drill out original joint of B-pillar.
– Cut out inner B-pillar.

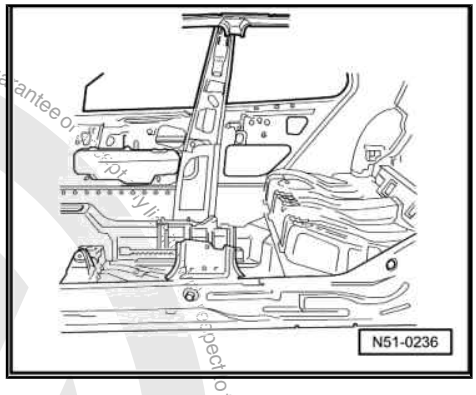


Note

Leave original joint to roof due to corrosion protection reasons.

satelettronica

– Remove remaining material.



9.1.2 Replacement parts

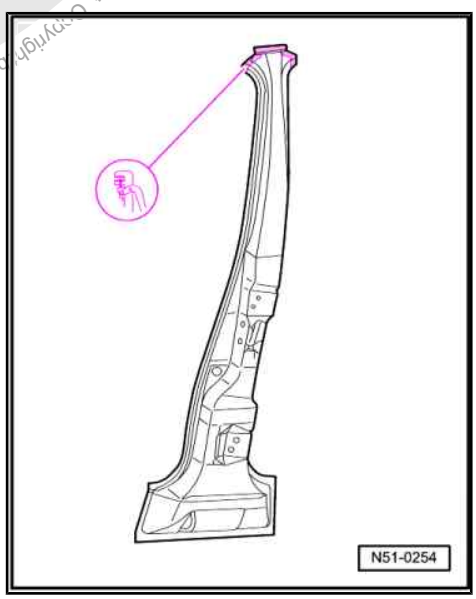
Note

Different B-pillars were installed in vehicles ‣ 10.99 and vehicles 11.99 ‣.

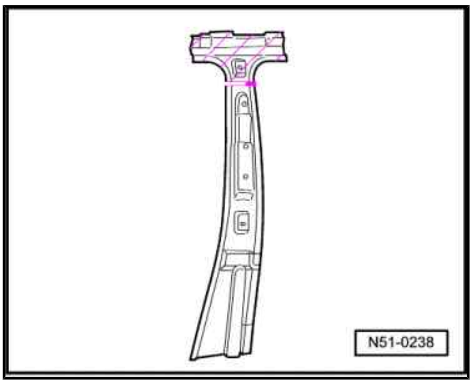
- Outer B-pillar
- Inner B-pillar

9.1.3 Welding in

Preparing new parts



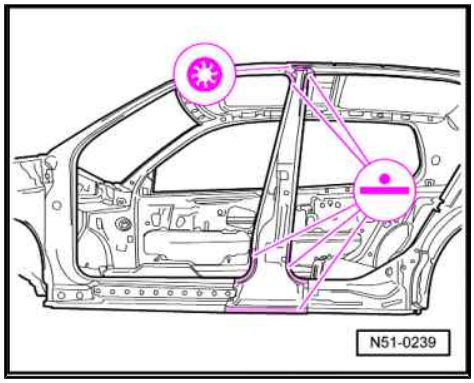
– Make holes in outer joint surface of new part.



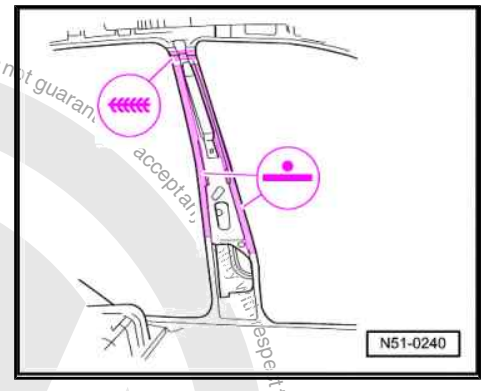
Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or assume any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica

- Transfer inner B-pillar parting cut to new part and remove shaded area.
- Adapt B-pillar to fit with vehicle free of tension.
- Check exactness of fit with doors installed.
- Spot weld B-pillar, RP spot weld seam.



- Weld in remaining joint, SG plug weld seam.
- Butt weld parting cut, SG continuous weld seam.
- Spot weld remaining joint in, RP spot weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

WARNING

Observe safety notes!

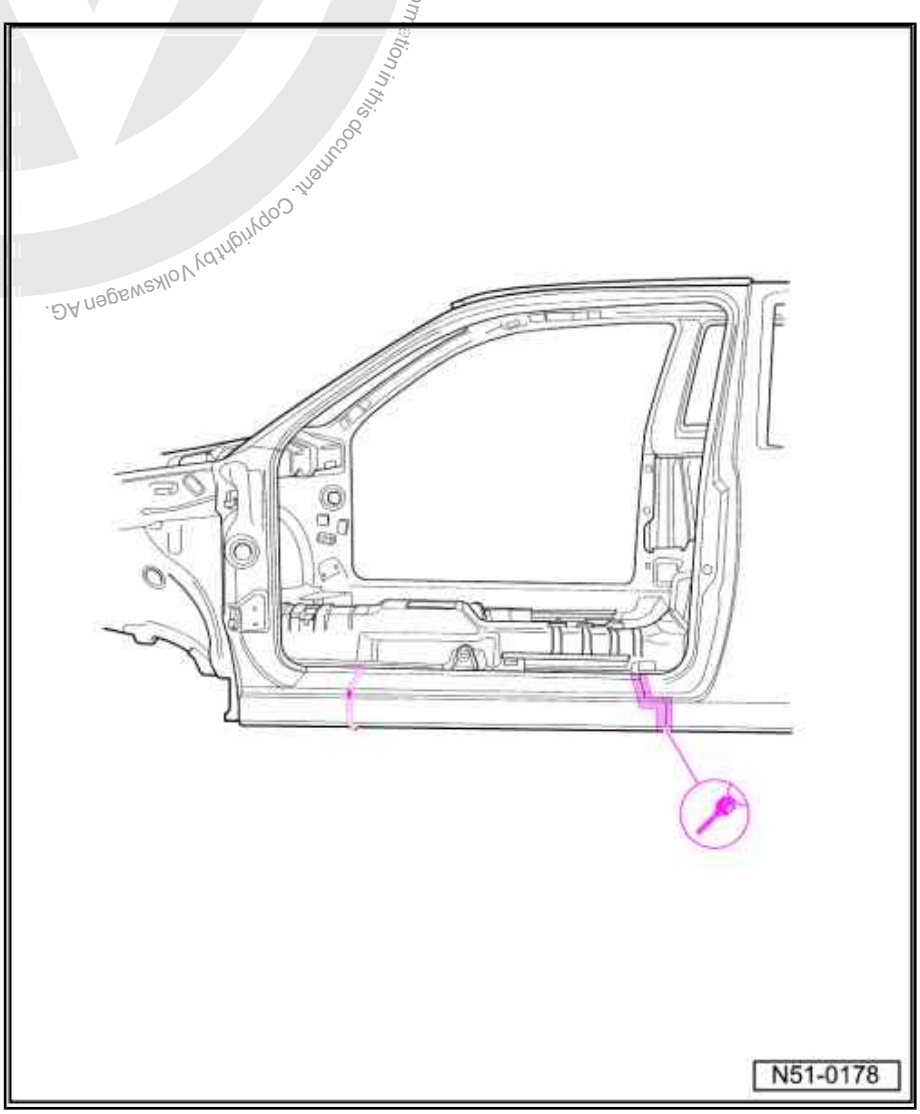
⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

10.1 Removing

Note

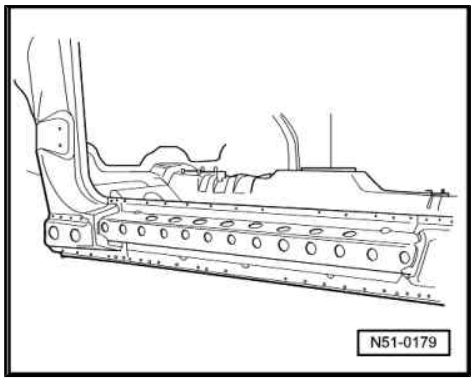
If the extent of damage permits, the following method of repair can be used.

10.1.1 Cutting locations



satelettronica

- Drill out spot welds.
- Separate original joint to floor panel.
- Position side member parting cuts according to degree of damage.
- Butt weld parting cut, SG continuous weld seam.
- Remove remaining material.

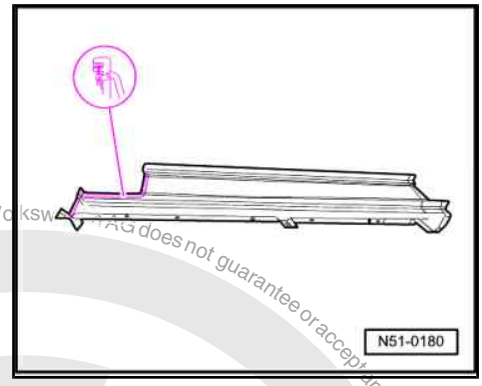


10.1.2 Replacement part

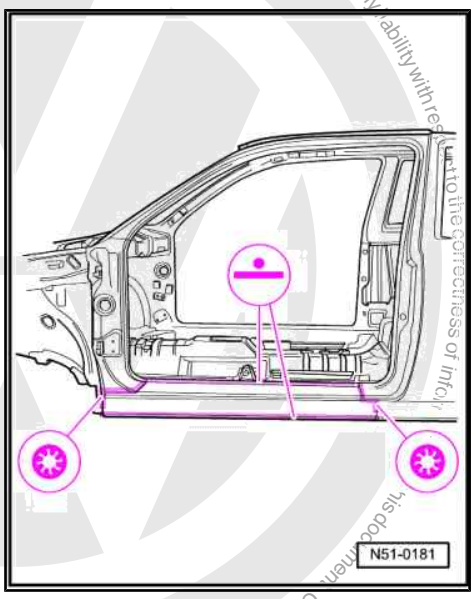
♦ Side member

10.1.3 Welding in

Preparing new part



- Make holes in outer joint surface of new part.
- Adapt side member to fit with vehicle stress free.
- Weld in side member, RP spot weld seam.
- Weld in remaining joint, SG plug weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

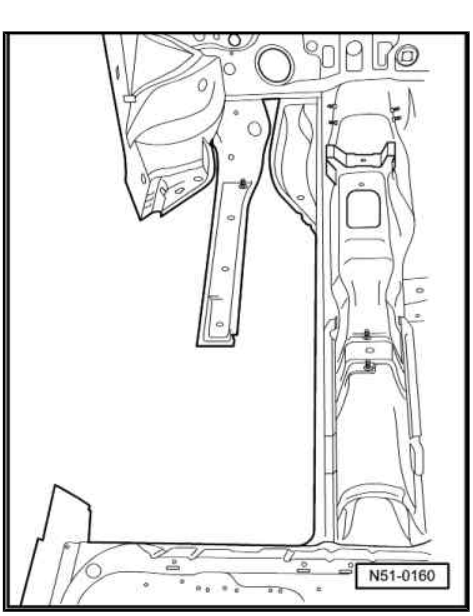
Protected by copyright. Copyright for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Copyright by Volkswagen AG.

satelettronica

- At parting cut -2-, carry out offset overlap weld to both sides, SG staggered continuous weld seam.
- Remove remaining material.

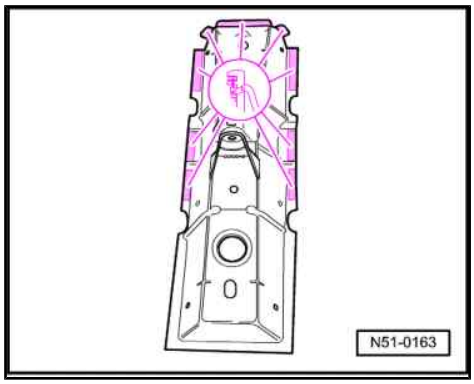


16.1.3 Replacement parts

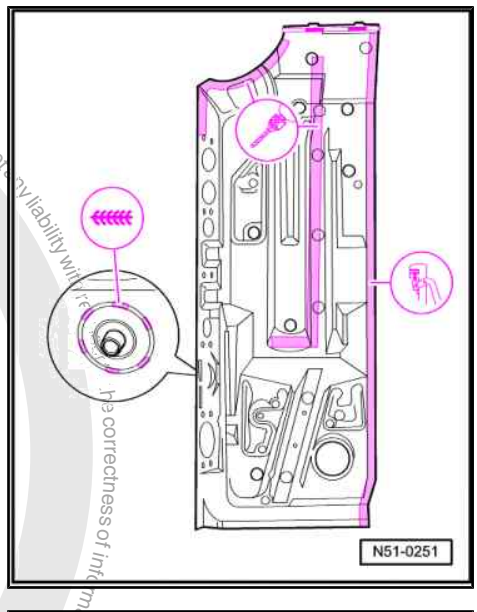
- Floor panel
- Floor panel connecting plate
- Seat cross member
- Guide rail
- Cover plate
- Weld nut
- Welding pins

16.1.4 Welding in

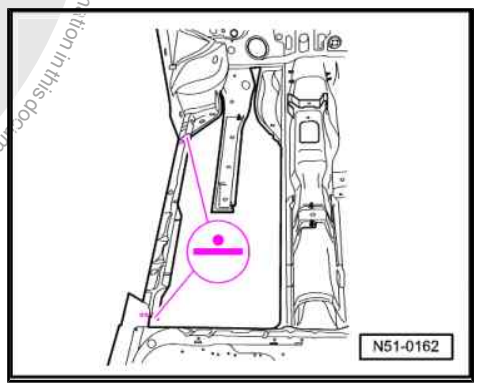
Preparing new parts



– Make holes in outer joint surface of new part.
– Centralize weld nut and weld in, SG continuous weld seam.
– Make holes in outer joint surface of new part.
– Drill holes for SG plug weld seam (7 mm ∅).

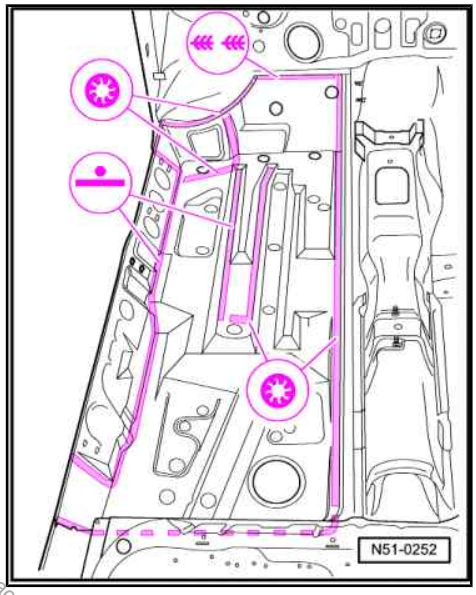


– Transfer parting cut to new part and cut out.
– Fix new part on alignment bracket.

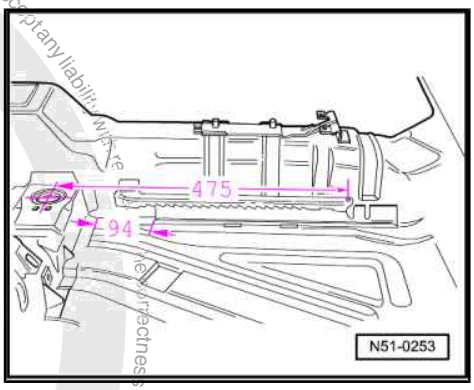


Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

– Weld in new part, RP spot weld seam.
– Adapt new part to fit and fix in position.
– Weld in floor panel, RP spot weld seam.
– At transition to bulkhead, SG staggered continuous weld seam.



– Weld in remaining joint, SG plug weld seam.
– Align seat cross member and hold in position.



Dimensions in mm
– Weld in seat cross member, RP spot weld seam.
– Weld in remaining joint, SG plug weld seam.

53 – Body - rear

RO: 53 05 55 00

1 Renewing rear cross panel

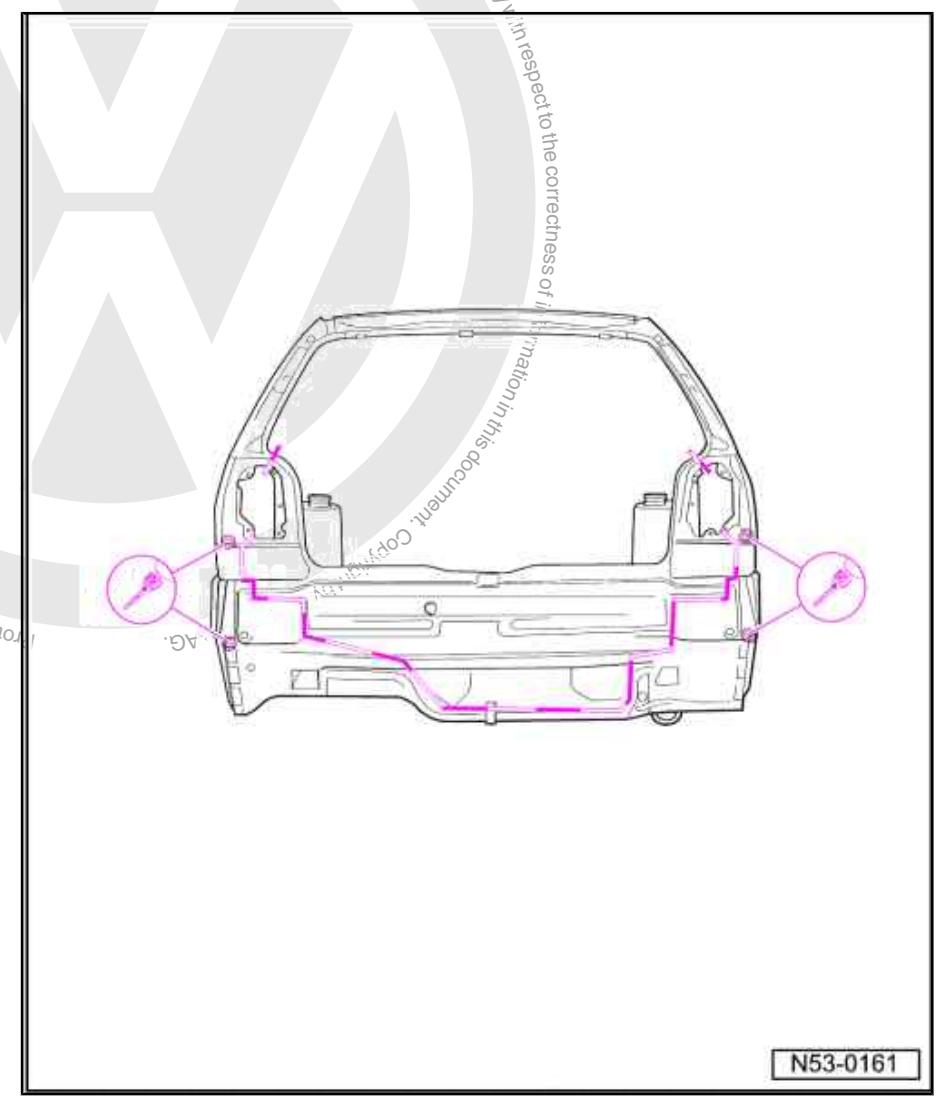
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes.

1.1 Removing

1.1.1 Cutting locations



– Cut out rear cross panel.
– Drill out spot welds.

satelettronica

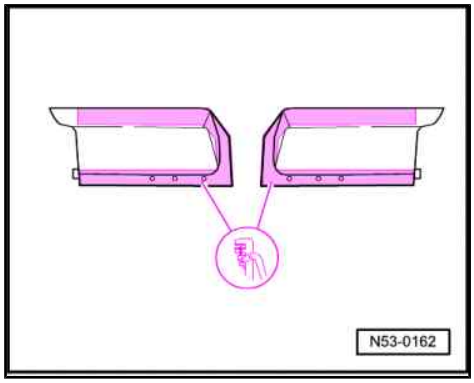
– Remove remaining material.

1.1.2 Replacement parts

- Rear cross panel
- Lock carrier
- Rear cross panel inserts

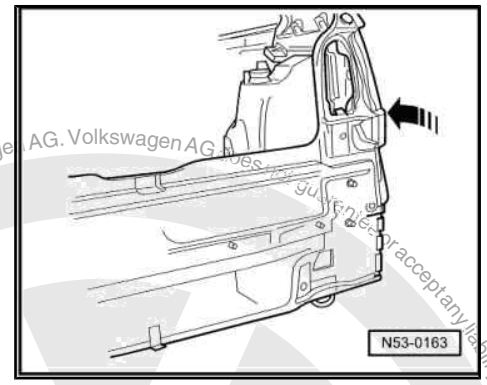
1.1.3 Welding in

Preparing new parts

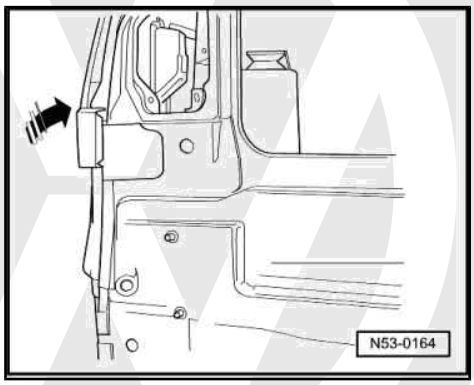


– Make holes in outer joint area of new part.

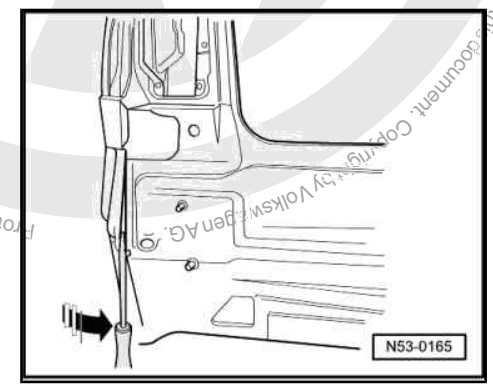
– Hold rear cross panel with one side below the inwards facing weld flange -arrow-.



– Slide rear cross panel simultaneously between wheel housing and side panel.

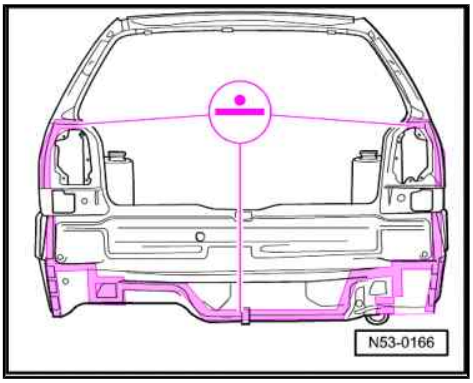


– On the opposite side, the part of the cross panel which is inclined inwards is lifted carefully over the the side panel flange -arrow-.

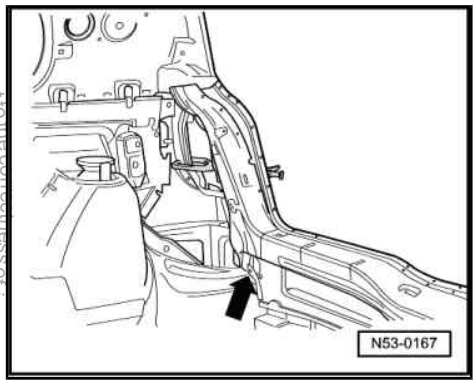


Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

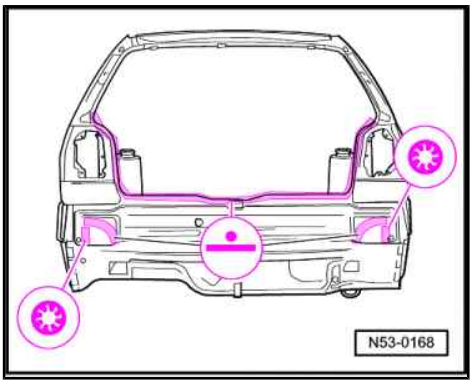
– Now lever cross panel under side panel, using a screwdriver and fitted in.



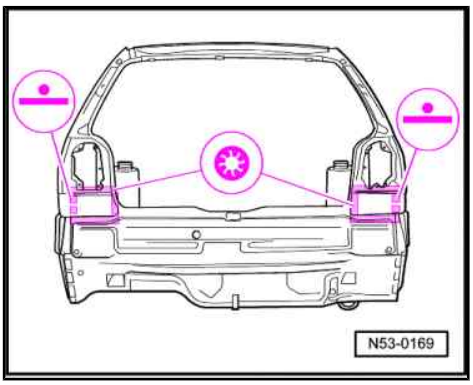
– Spot weld cross panel, RP spot weld seam.



– Push lock carrier between longitudinal member reinforcing and cross panel from inside -arrow- and bring into installation position.
– Fit in rear cross panel inserts.
– Check gap to tail light and rear lid.
– Check locking function of rear lid.
– Spot weld cross panel and lock carrier, RP spot weld seam.



– Weld in remaining joint, SG plug weld seam.
– Weld in inserts, SG plug weld seam.
– Additionally weld in from inside, RP spot weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

2 Renewing rear luggage compartment floor - part section

WARNING

Observe safety notes!

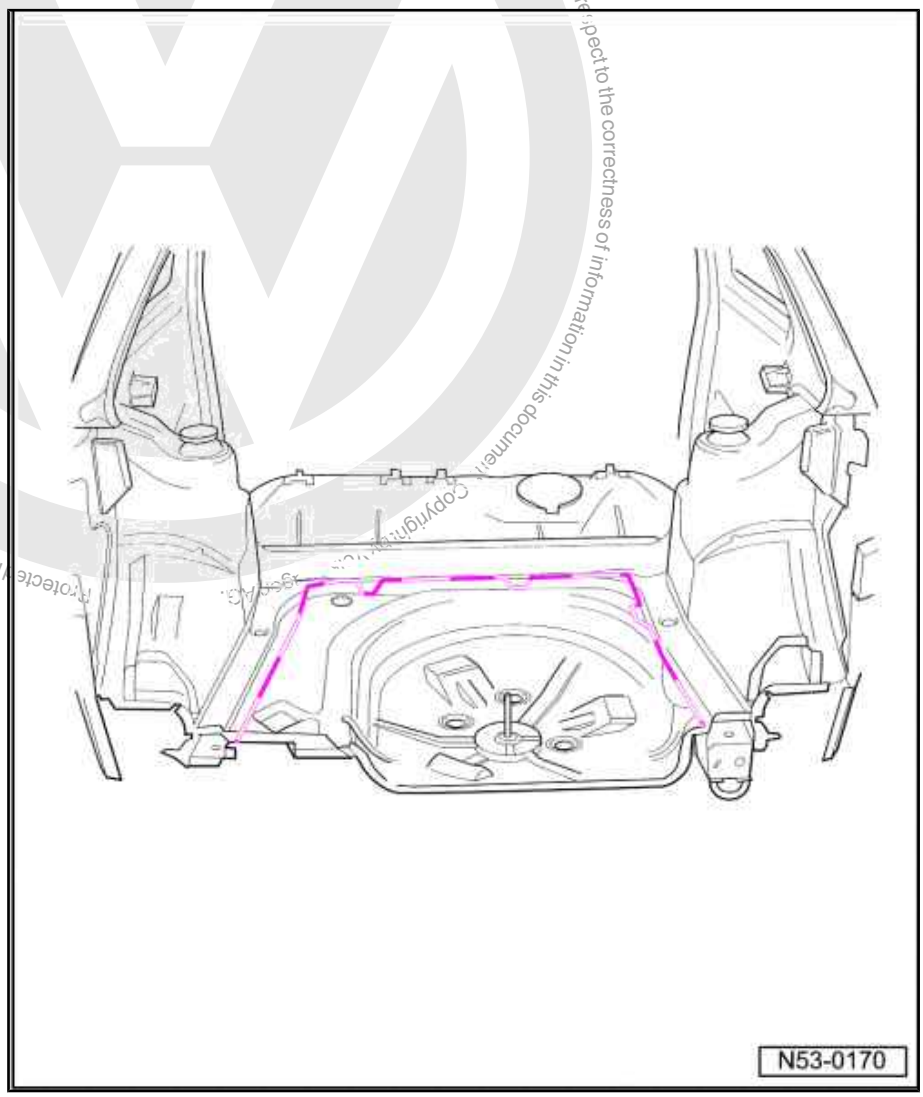
⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

2.1 Removing

Note

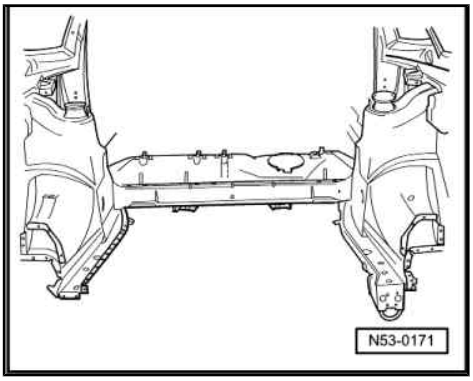
The replacement subpart is welded to the cross member.

2.1.1 Cutting locations



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

– Position parting before cross member.
– Remove remaining material.

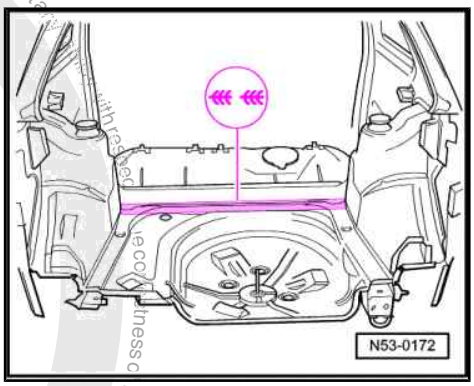


2.1.2 Replacement parts

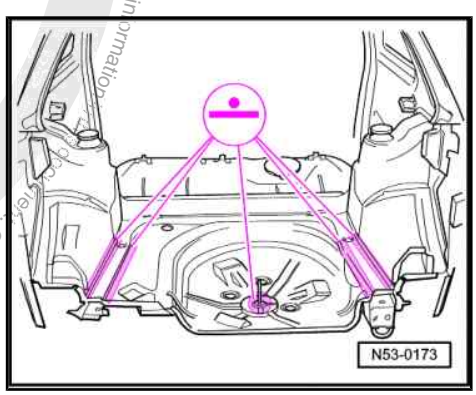
- Luggage compartment floor subpart
- Bracket for spare wheel
- Bracket for tensioning straps

2.1.3 Welding in

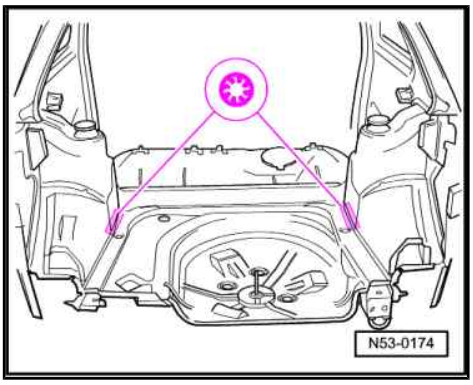
– Measure and mark parting cut, taking into consideration extra for overlap weld above cross member.
– Align floor panel with vehicle stress free and check gaps with rear cross panel and rear lid in position.



– At parting cut, carry out offset overlap weld to both sides, SG staggered continuous weld seam.
– Weld in luggage compartment floor, RP spot weld seam.



– Spot weld brackets for spare wheel and tensioning straps, RP spot weld seam.
– Weld in luggage compartment floor, SG plug weld seam.
– Weld in cross panel ⇒ page 94 .



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

3 Renewing rear longitudinal member - part section

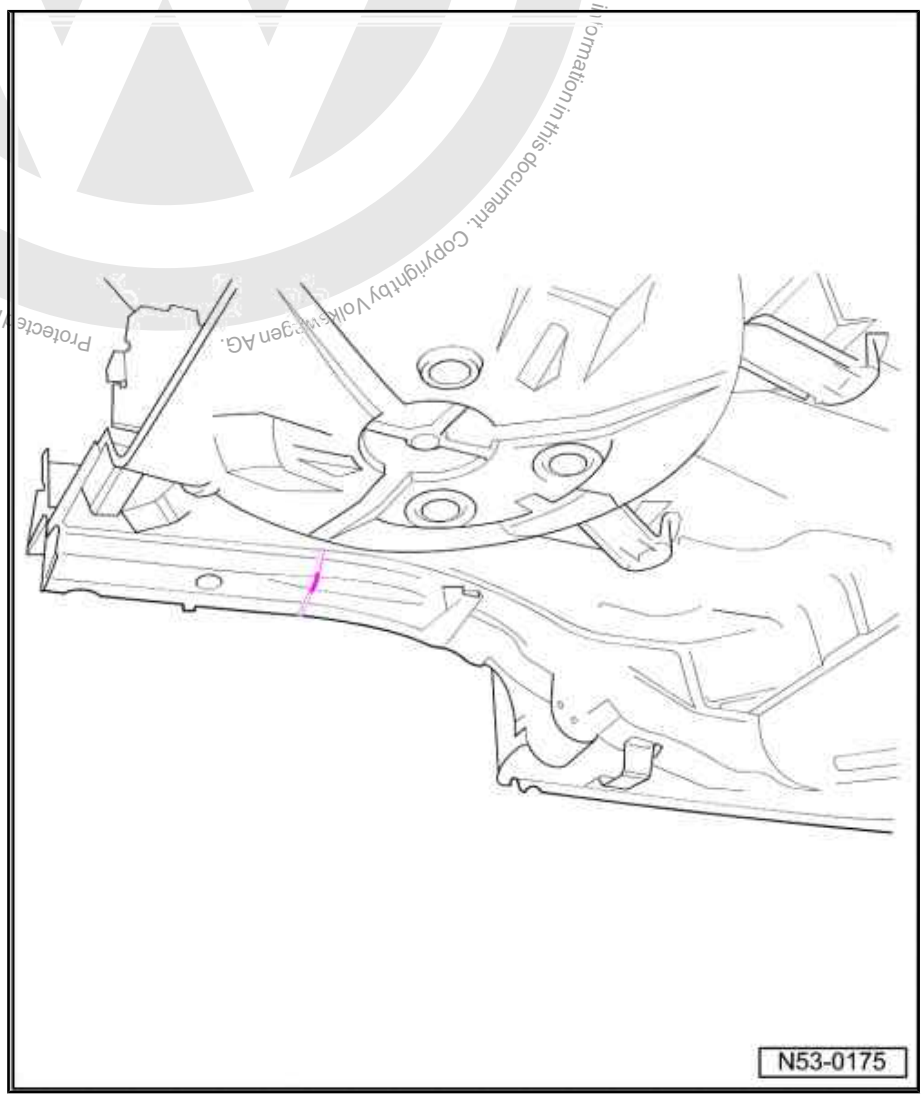
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

3.1 Removing

3.1.1 Cutting locations



– Cut out longitudinal member.

Protected by copyright. Copyright for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

Protected by copyright. Copyright for private or commercial purposes, part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

Note

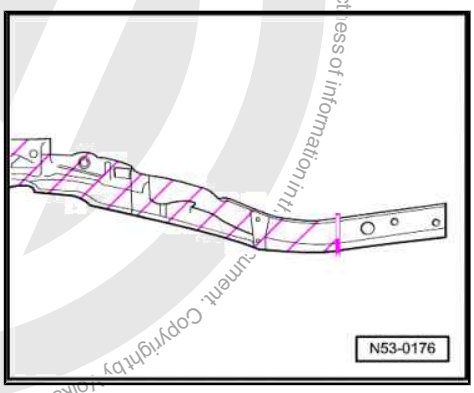
Due to an internal reinforcing, parting cut is permissible only at this position!

3.1.2 Replacement part

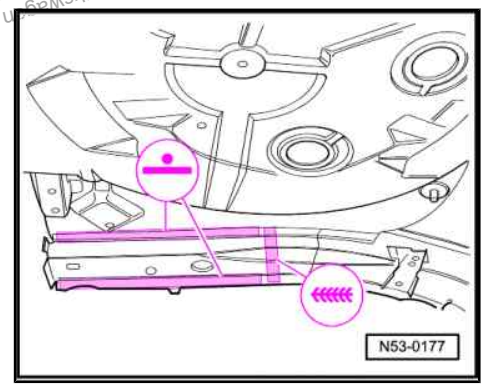
- Rear longitudinal member

3.1.3 Welding in

Preparing new part



- Transfer parting cut to longitudinal member and cut off shaded section.
- Secure longitudinal member to alignment bracket.
- Butt weld parting cut, SG continuous weld seam.
- Spot weld rear longitudinal member, RP spot weld seam.



satelettronica

RO: 53 55 55 00

4 Renewing side panel - part section (2-door)

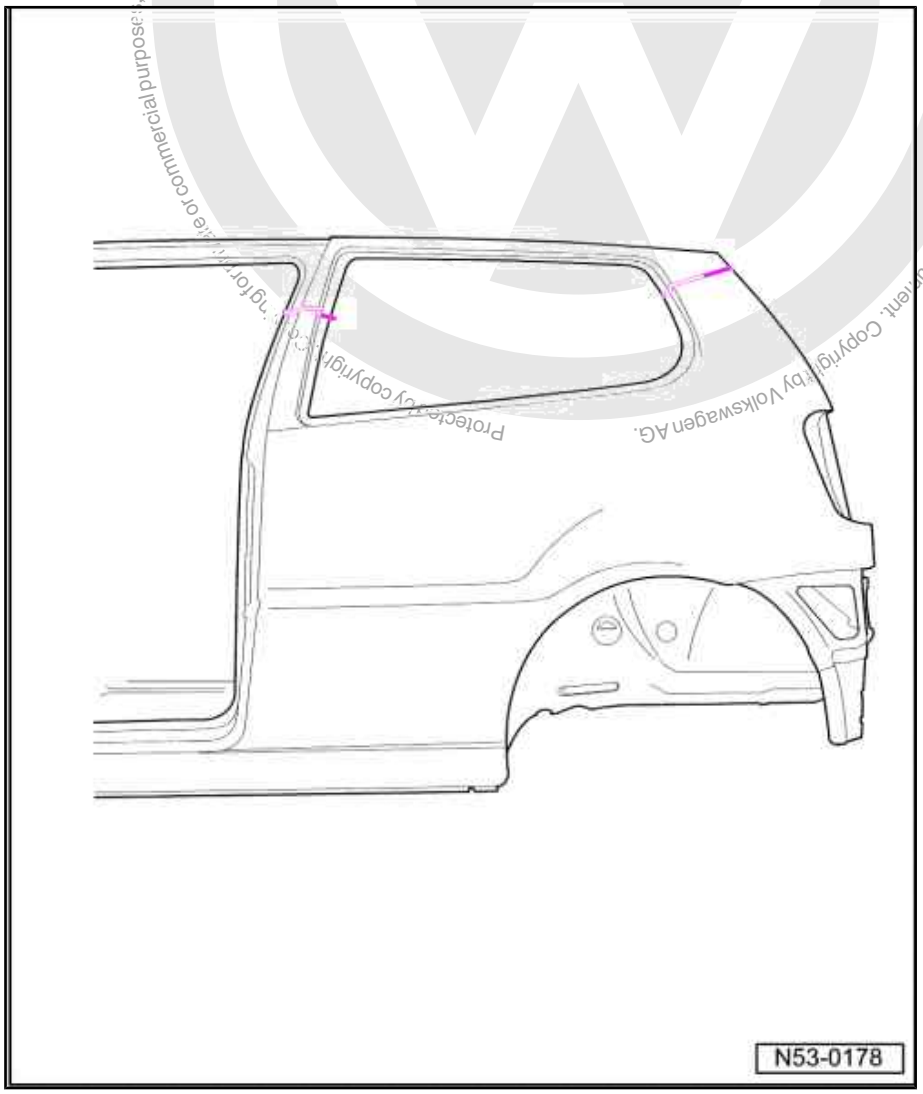
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

4.1 Removing

4.1.1 Cutting locations

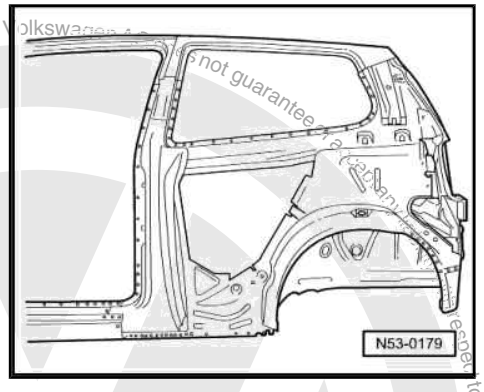


– Make parting cut on B and C-pillar according to degree of damage.

– Cut out side panel.

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

– When cutting out side panel, take care not to damage internal reinforcement in B-pillar.
– Remove remaining material.



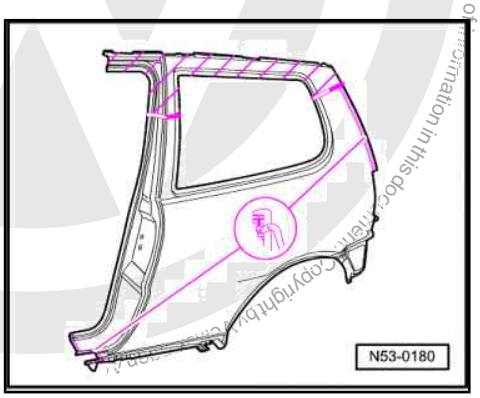
4.1.2 Replacement part

♦ Side panel

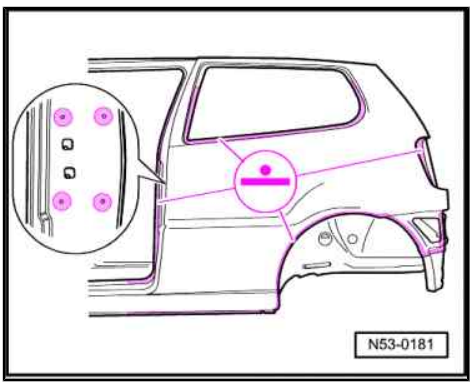
4.1.3 Welding in

Preparing new part

– Transfer parting cut to new part and remove shaded area.

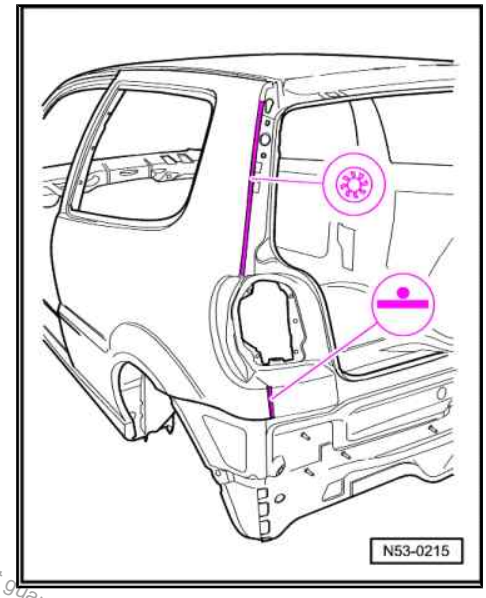


– Make holes in outer joint surface of new part.
– Adapt side member to fit with vehicle free of tension
– Before welding in, check gaps to adjacent parts.
– Place backing material behind parting cut on C-pillar.
– Weld in side panel, RP spot weld seam.

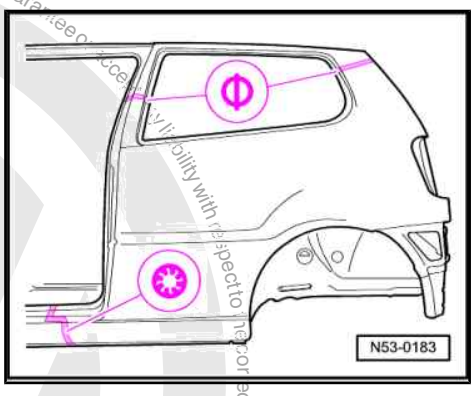


Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or assume any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

– Weld in B-pillar reinforcing for striker pin, RP spot weld seam.
– Weld in side panel, SG plug weld seam.

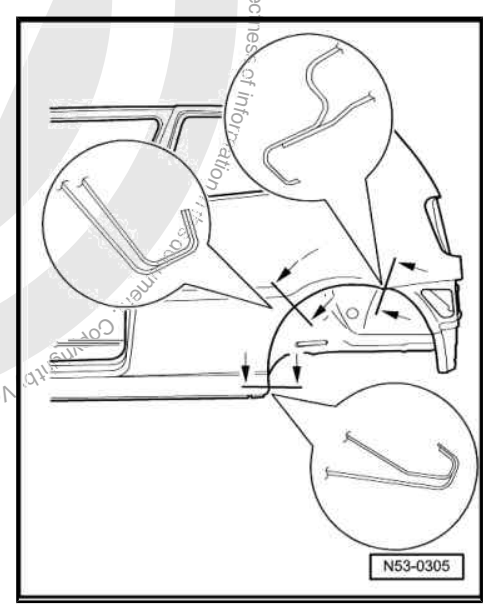


– Weld in insert from inside, RP spot weld seam.
– Weld in parting cuts, SG stepped weld seam.
– Weld in remaining joint, SG plug weld seam.



4.1.4 Reforming wheel housing flange

– With introduction of the 14" running gear from model year 1996, the wheel housing flange must be reformed inwards once welding of side panel is complete.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

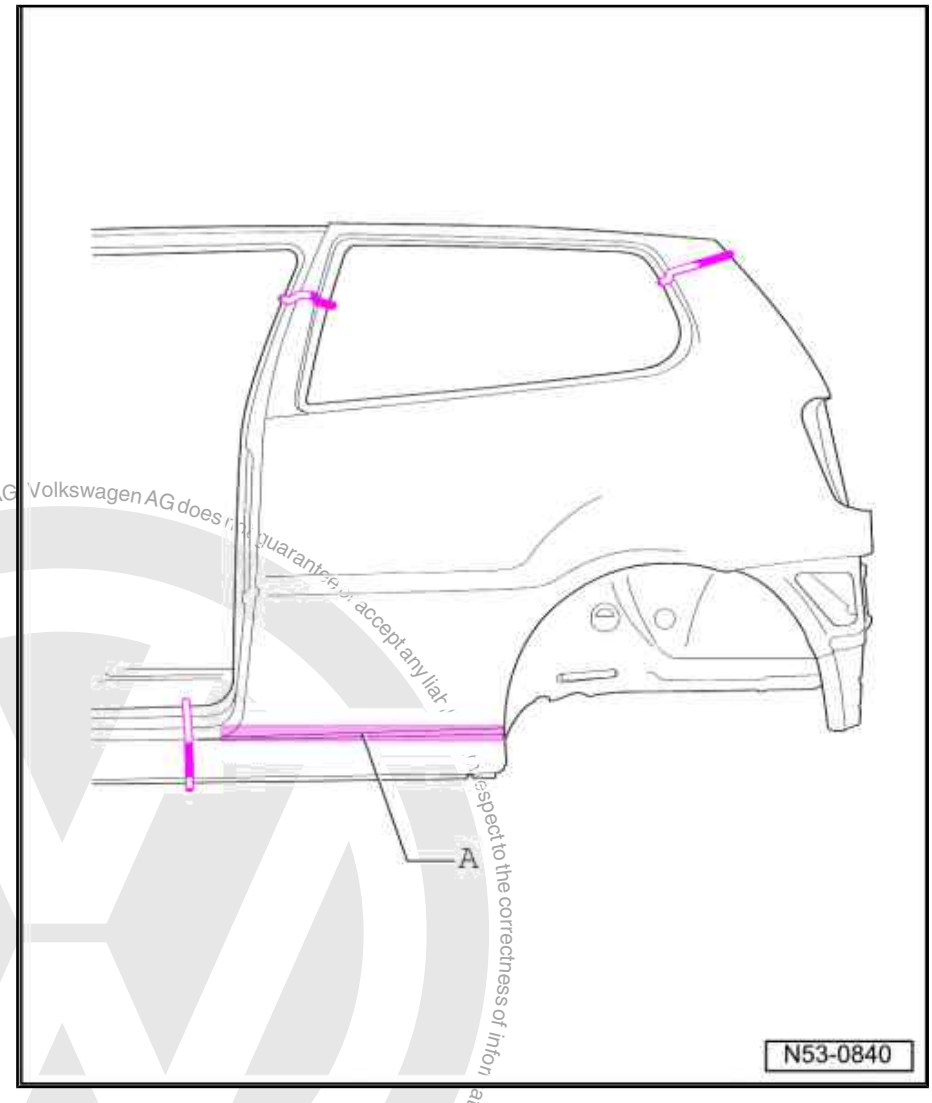
- *The side panel does not project into the side member, it only goes down to area -A-.*
- *Area -A- is laser welded.*
- *Position side member parting cuts according to degree of damage.*
- *The outer side member must also be replaced as a "part section" as this area is not accessible from the inside in cases of repair.*
- *Weld side panel and outer side member together before welding in.*

6.1.1 Cutting locations



– Make parting cut on B and C-pillar according to degree of damage. Do not damage internal reinforcement.

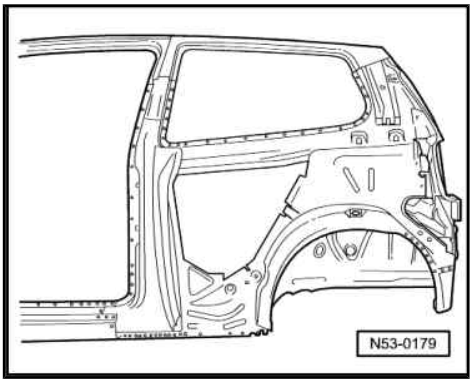
satelettronica

– Cut out side panel and side member part section.
– Remove remaining material.



6.1.2 Replacement part

- Side panel
- Outer side member

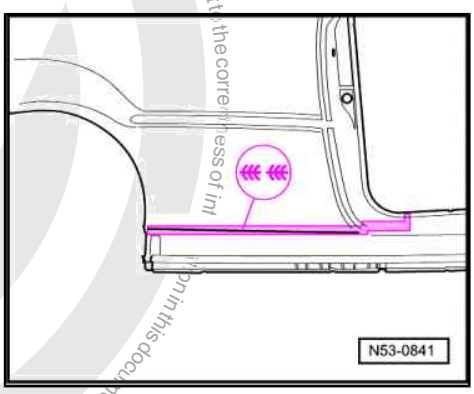
6.1.3 Welding in

Note

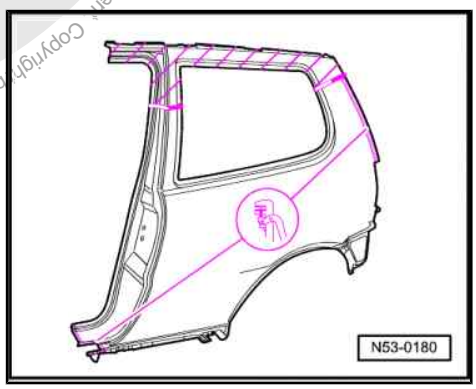
Apply heat dissipation paste, on outside, in area of weld to prevent distortion.

Preparing new part

– Cut out side member, bearing in mind size of replacement part.
– Join side panel and side member together and align.

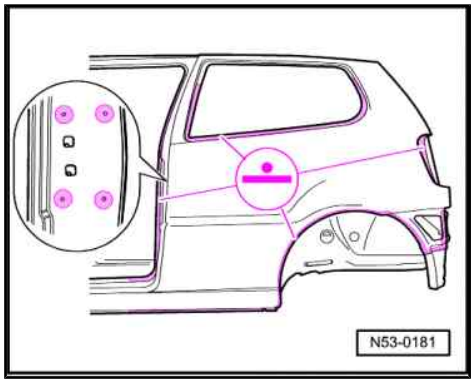


– Weld side panel and side member together on inner side, SG staggered continuous weld seam.
– Transfer parting cut to new part and remove shaded area.

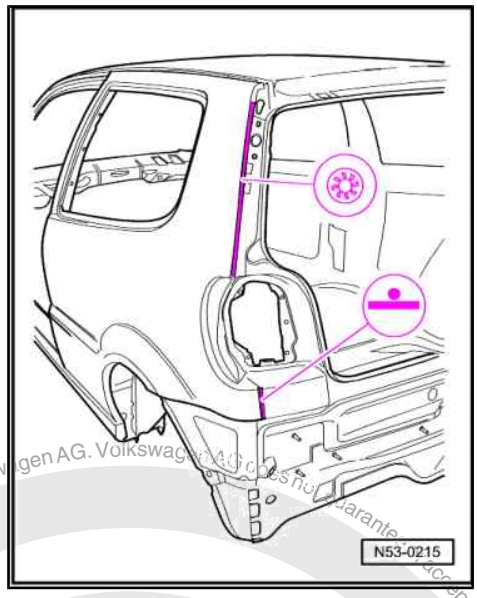


Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

- Make holes in outer joint surface of new part.
- Adapt side member to fit with vehicle free of tension
- Before welding in, check gaps to adjacent parts.
- Place backing material behind parting cut on C-pillar.
- Weld in side panel, RP spot weld seam.



- Weld in B-pillar reinforcing for striker pin, RP spot weld seam.
- Weld in side panel, SG plug weld seam.



- Weld in insert from inside, RP spot weld seam.
- Weld in parting cuts, SG stepped weld seam.

satelettronica

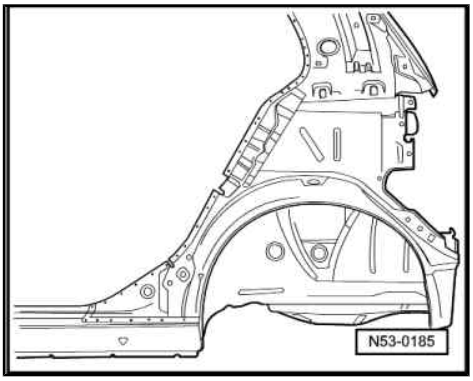
– Make parting cut on C-pillar according to degree of damage.
– Cut out side panel.

– Separate original joint.
– Remove remaining material.



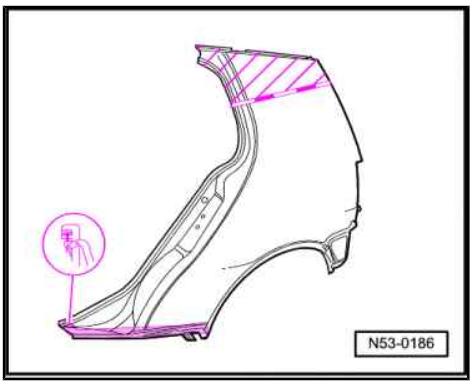
7.1.2 Replacement part

- Side panel
- C-pillar reinforcing for striker pin

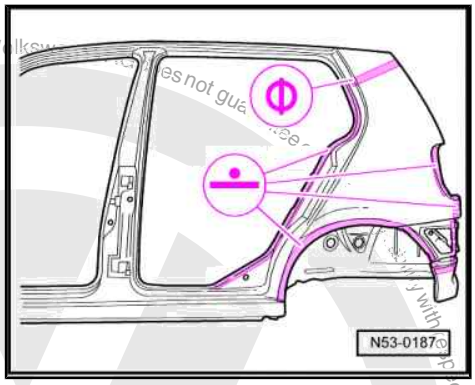
7.1.3 Welding in

Preparing new part

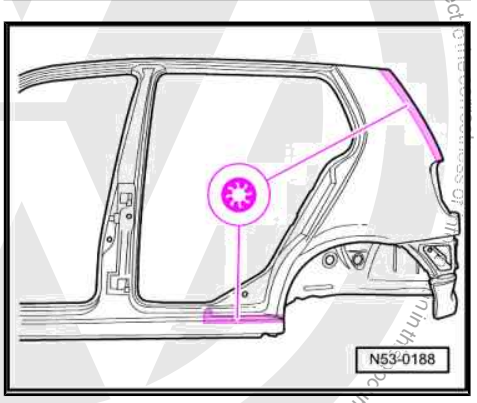
– Transfer parting cut to new part and remove shaded area.
– Make holes in outer joint surface of new part.



– Spot weld C-pillar reinforcing for striker pin, RP spot weld seam.
– Adapt side member to fit with vehicle free of tension
– Before welding in, check gaps to adjacent parts.
– Place backing material behind parting cut on C-pillar.
– Weld in side panel, RP spot weld seam.
– Weld in parting cut, SG stepped weld seam.



– Weld in insert from inside, RP spot weld seam.
– Weld in side panel, SG plug weld seam.



satelettronica

7.1.4 Reforming wheel housing flange

– With introduction of the 14" running gear from model year 1996, the wheel housing flange must be reformed inwards once welding of side panel is complete.

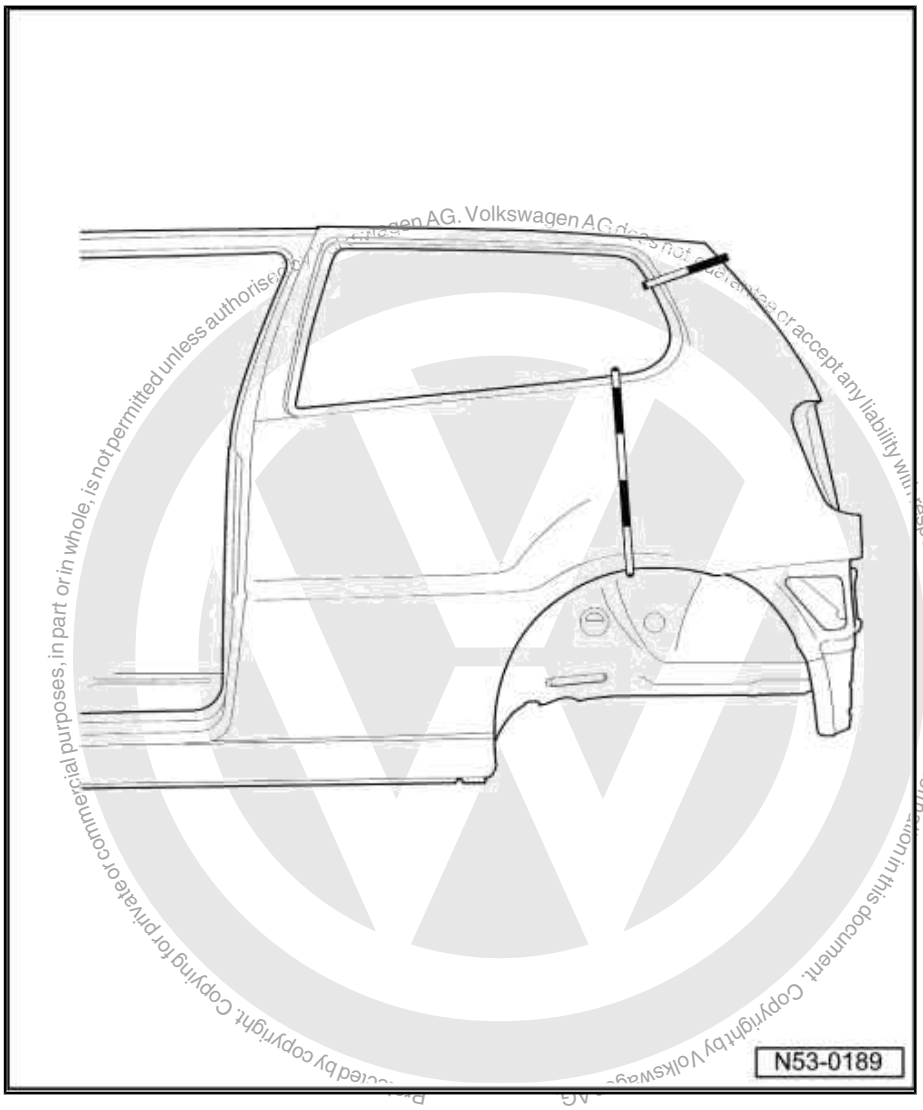
8.1 Removing

Note

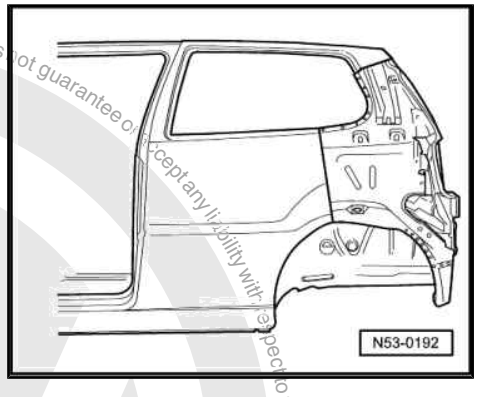
Make parting cut above wheel housing with pneumatic sabre saw -V.A.G 1523- .

8.1.1 Cutting locations



satelettronica

– Cut out side panel.
– Remove remaining material.



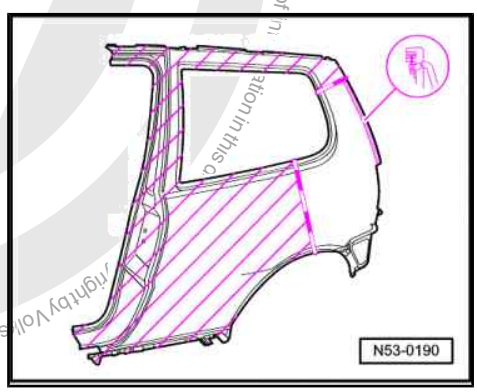
8.1.2 Replacement part

♦ Side panel

8.1.3 Welding in

Preparing new part

– Transfer parting cuts to new parts and cut away shaded area.



– Make holes in outer joint surface of new part.
– Adapt side member to fit with vehicle free of tension
– Before welding in, check gaps to adjacent parts.
– Place backing material behind parting cuts.
– Weld in parting cuts, SG stepped weld seam.

10 Renewing rear wheel housing

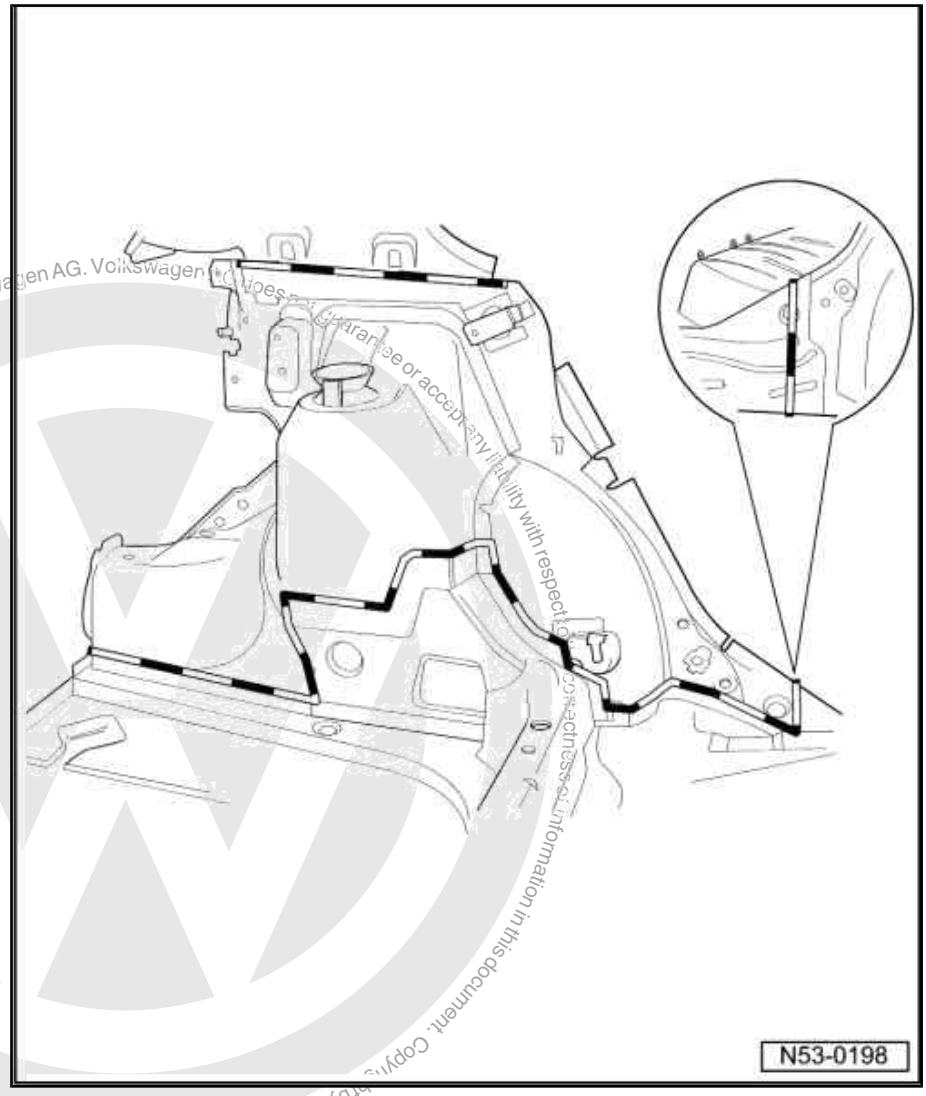
WARNING

Observe safety notes!

⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

10.1 Removing

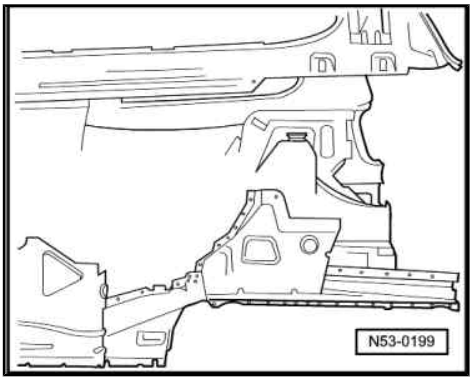
10.1.1 Cutting locations



– Cut out wheel housing.

Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

– Separate carrier panel vertically vertically-enlargement-.
– Remove remaining material.

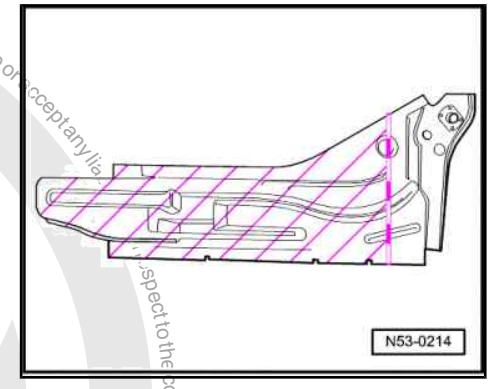


10.1.2 Replacement parts

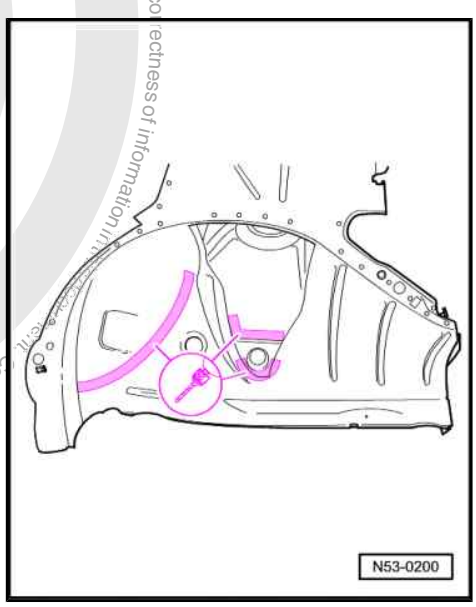
- Wheel housing
- Outer wheel housing liner
- Carrier panel

10.1.3 Welding in

Preparing new parts

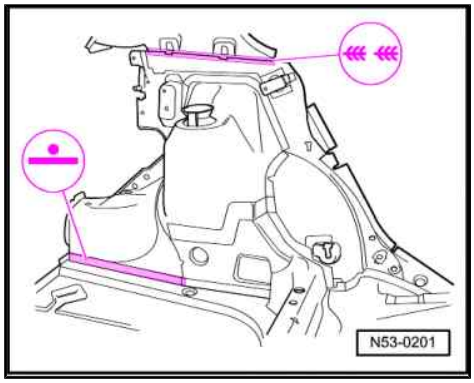


– Transfer parting cut to new part and remove shaded area.
– Secure wheel housing to alignment fixture.
– Mark position of holes for SG plug weld seam.
– Remove wheel housing.

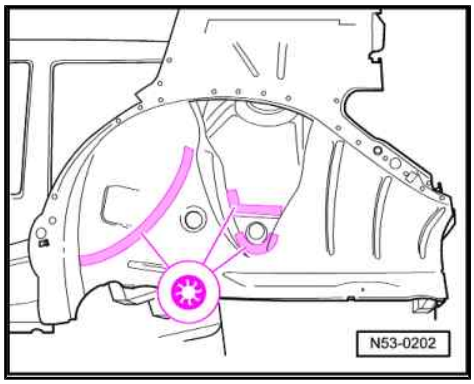


Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

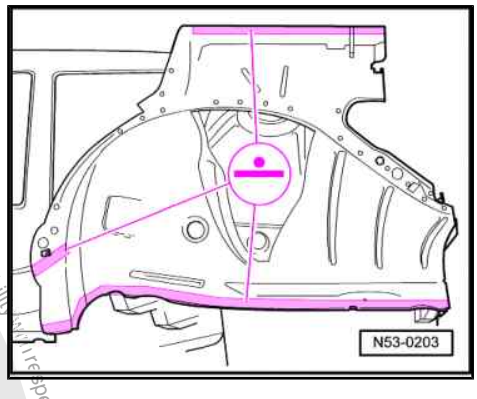
– Drill holes for SG plug weld seam (7 mm ∅).
– Secure wheel housing to alignment fixture.
– Check precision of fit with attached parts.
– Spot weld wheel housing, RP spot weld seam.



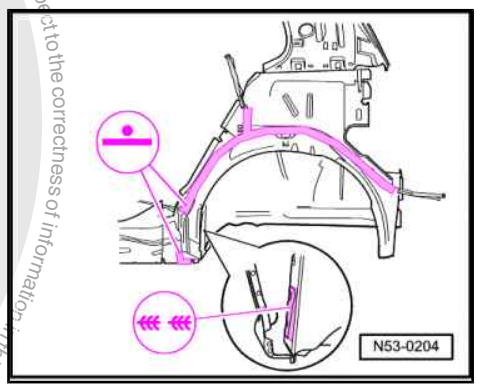
– Weld in remaining joint, SG staggered continuous weld seam.



– Weld in wheel housing, SG plug weld seam.

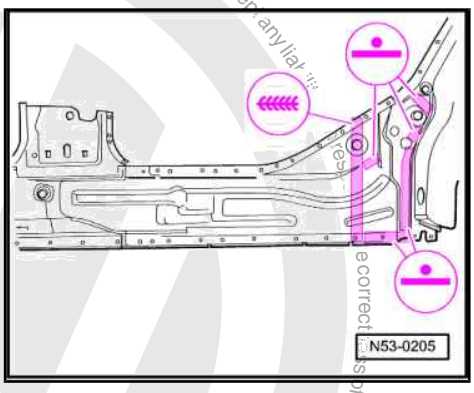


– Spot weld wheel housing, RP spot weld seam.
– Adapt wheel housing liner to fit, and check gaps with side panel fitted and vehicle free of tension.
– Detach side panel.
– Weld in wheel housing liner, RP spot weld seam.



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.

satelettronica



- Weld in remaining joint, SG staggered continuous weld seam.
- Adapt carrier panel to fit and hold in position.
- Butt weld parting cut, SG continuous weld seam.
- Spot weld remaining joint in, RP spot weld seam.
- Weld in side panel for 2-door vehicle ⇒ page 101 .
- Weld in side panel for 4-door vehicle ⇒ page 113 .

12 Renewing outer wheel housing liner

WARNING

Observe safety notes!

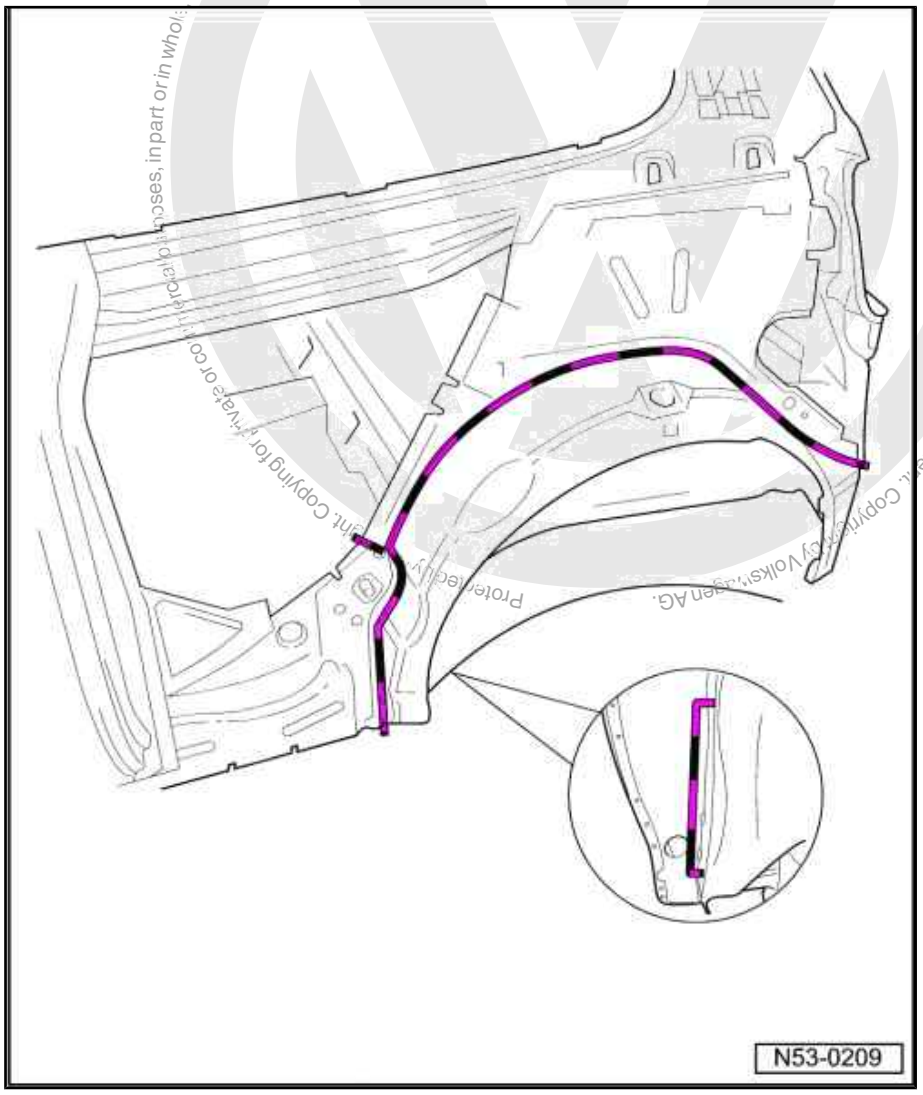
⇒ General Information; Body Repairs, General Body Repairs ; Chapter 1 - Safety notes .

12.1 Removing

Note

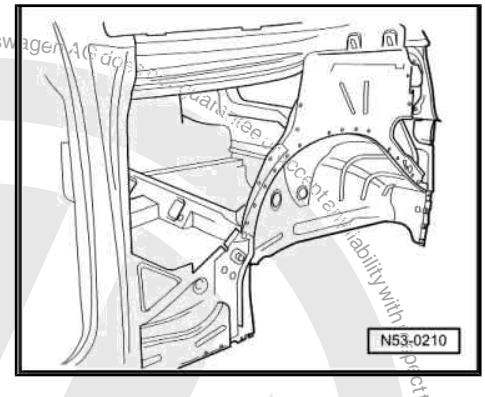
Leave an approx. 20 mm wide strip in area of front overlap -enlargement-

12.1.1 Cutting locations



Protected by copyright. Copying for private or commercial purposes, in part or in whole, is not permitted unless authorised by Volkswagen AG. Volkswagen AG does not guarantee or accept any liability with respect to the correctness of information in this document. Copyright by Volkswagen AG.
satelettronica

– Cut out wheel housing liner.
– Remove remaining material.

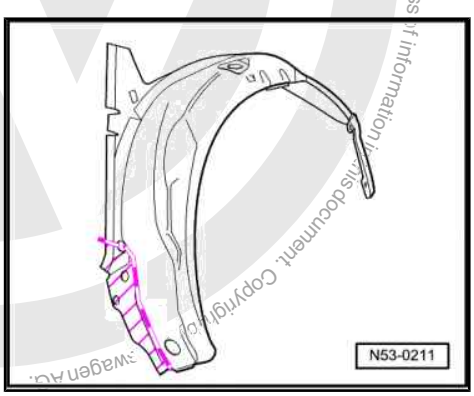


12.1.2 Replacement part

♦ Outer wheel housing liner

12.1.3 Welding in

Preparing new part



– Transfer separating cut to new part plus 10 mm for overlap. Cut off shaded area.
– Adapt new part to fit and fix in position.
– Adapt wheel housing liner to fit, and check gaps with side panel fitted and vehicle free of tension.
– Detach side panel.
– Spot weld wheel housing liner, RP spot weld seam.
– Butt weld parting cut, SG continuous weld seam.
– Weld in side panel for 2-door vehicle ⇒ page 101 .
– Weld in side panel for 4-door vehicle ⇒ page 113 .
